

**INFORMATION TO OFFERORS OR QUOTERS
SECTION A - COVER SHEET**

*Form Approved
OMB No. 9000-0002
Expires Oct 31, 2004*

The public reporting burden for this collection of information is estimated to average 35 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Department of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (9000-0002), 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person will be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

PLEASE DO NOT RETURN YOUR FORM TO THE ABOVE ADDRESS. RETURN COMPLETED FORM TO THE ADDRESS IN BLOCK 4 BELOW.

1. SOLICITATION NUMBER	2. (X one)	3. DATE/TIME RESPONSE DUE
	<input type="checkbox"/> a. INVITATION FOR BID (IFB)	
	<input type="checkbox"/> b. REQUEST FOR PROPOSAL (RFP)	
	<input type="checkbox"/> c. REQUEST FOR QUOTATION (RFQ)	

INSTRUCTIONS

NOTE: The provision entitled "Required Central Contractor Registration" applies to most solicitations.

1. If you are not submitting a response, complete the information in Blocks 9 through 11 and return to the issuing office in Block 4 unless a different return address is indicated in Block 7.
2. Offerors or quoters must include full, accurate, and complete information in their responses as required by this solicitation (including attachments). "Fill-ins" are provided on Standard Form 18, Standard Form 33, and other solicitation documents. Examine the entire solicitation carefully. The penalty for making false statements is prescribed in 18 U.S.C. 1001.
3. Offerors or quoters must plainly mark their responses with the Solicitation Number and the date and local time for bid opening or receipt of proposals that is in the solicitation document.
4. Information regarding the timeliness of response is addressed in the provision of this solicitation entitled either "Late Submissions, Modifications, and Withdrawals of Bids" or "Instructions to Offerors - Competitive Acquisition".

SECTION B
SUPPLIES OR SERVICES AND PRICES/COSTS

Ref No.	Title	Reference	Date
B .0	<u>CLAUSES INCORPORATED BY REFERENCE</u>	FAR 52.252-2	Feb 1998

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Also, the full text of a clause may be accessed electronically at this/these address (es):

<http://www.dla.mil/j-3/j-336/icps.htm>, <http://farsite.hill.af.mil/> or <http://www.arnet.gov/far/> or for DRMS Local Clauses <http://www.drms.dla.mil/newproc/html/clauses.html>

B .1	<u>SERVICES</u>	DRMS 52.217-9R05	Mar 1993
------	-----------------	------------------	----------

B .2	<u>BASIC AND OPTION PERIOD PRICING</u>	DRMS 52.217-9R06	Mar 1993
------	--	------------------	----------

(a) Pages 6 through 17 are estimated generations for the 18 month base period.

(b) Pages 18 through 29 are estimated generations for the 18 month option period.

(c) For evaluation purposes, the following is to be completed:

Total estimated price, 18 month base period \$ _____

Total estimated price, 18 month option period \$ _____

Total estimated price for evaluation purposes \$ _____

B .4	<u>BASIC AND OPTION PERIOD UNIT PRICING</u>	DRMS 52.217-9R07	Jan 2000
------	---	------------------	----------

B .5	<u>CONTRACT MINIMUM/MAXIMUM</u>	DRMS 52.217-9R08	Jul 2001
------	---------------------------------	------------------	----------

A. This is a firm-fixed price indefinite quantity contract. The minimum for the base period and each of the priced options shall be 10% of the estimated value of the period. The maximum for the base and each of the priced options shall be 200% of the estimated value of the period.

B. Clause F.10 allows the Government to unilaterally extend the contract for up to six (6) months at the end of either the base or any option period. The per month minimum and maximum guarantee under the extension shall be computed by applying the same percentage as above to a monthly estimated price derived from the total estimated value for the period.

PICK UP LOCATIONS
POC: CARRIE GROVES (619) 437-9872 DSN (577)

Contractor will be required to make pick ups in and around the grounds at the following Defense Reutilization and Marketing Office (DRMO) and generators:

6345	Expedited performance for 6000-series CLINs – 1 day [see C.51]	3	ea		
6350	Tank Cleaning/Services (Above Ground) Mobilization cost [see C.46]	38	ea		
6351	Tank Cleaning/Services (Below Ground) Mobilization cost [see C.46]	22	ea		
6353	Tank Cleaning/Services (Plating Vats) Mobilization cost [see C.46]	3	ea		
6355	Tank Cleaning/Services (Other Pipes) Mobilization [see C.46 & C.76]	10	ea		
6356	Tank Cleaning/Services – Additional Mobilization cost – confined space entry [see C.46]	45	ea		
6357	Tank Cleaning Services – Additional Mobilization cost – Vactor/Eductor truck rental [see C.46]	300	hr		

6360	Personnel for cleaning/servicing of tanks, totes, oil/water separators, pipes – Team Leader [see C.46]	300	hr		
6361	Personnel for cleaning/servicing of tanks, totes, oil/water separators, pipes – Technician [see C.46]	300	hr		
6372	Storage container daily rental (20 cy) [see C.50]	450	dy		
6372AD	Storage container daily rental (20 cy sludge bin) [see C.50]	200	dy		
6375	Storage container daily rental (40 cy) [see C.50]	1200	dy		
6375AA	Storage container annual rental (20 cy) [see C.50]	5	ea		
6375BB	Storage container annual rental (40 cy) [see C.50]	5	ea		
6376DC	Drop Charge [see C.50]	63	ea		
6377	Provide overpack containers of various sizes [see C.78]				Cost Reimbursement Not to Exceed \$5,000.00
6388	Transportation charge (move containers on same installation) [see C.75]	15	ea		
6388AA	Transportation charge (return Government container from commercial disposal facility) [see C.75]	5000	mi		
6400	Perform appropriate analysis to properly identify unknown hazardous property and complete waste profile form	5	ea		
6401	Perform Hazardous Waste Characteristics Analysis to determine ignitability (D001), corrosivity (D002), reactivity (D003)	5	ea		
6403	Perform TCLP Metals analysis to determine 8 TCLP metals (D004-D011)	5	ea		

6413	Perform analysis to determine Halogenated Volatile Organics (EPA Method 8101)	5	ea		
6417	Test for semi-volatile organics as listed in 22 CCR 66268, Appendix III	5	ea		
6420	Perform the following tests: EPA 8080 PCBs and Organochlorine Pesticides; EPA 8140 Organophosphorous pesticides; EPA 8240 Volatile Organics; EPA 8270 Semi-Volatile Organics; EPA 9010 Cyanides; TCLP metals (8); CCR TTLC (17) metals. If results of TTLC are 10 times greater than STLC, then run STLC.	5	ea		
6421	Perform test for asbestos	5	ea		
6424	Perform Polychlorinated Biphenyl (PCB) analysis using EPA SW-846 method 8082	5	ea		
6500MM	Surcharge for disposal of high level mercury [see C.43]	25000	lb		
6502	Perform Management Services as described in clause C.78. May include (but not limited to) preparation of waste documentation, labeling and marking containers, waste transportation and/or pumping, spill response, internal and external reports, operate 90 day or CSF, etc [see C.78]	2000	hr		
6502BB	Perform Management Services as described in clause C.78b for puncturing of aerosol cans [see C.78]	500	hr		
6609ME	Supplies Reimbursement [see C.79]				Cost Reimbursement Not to Exceed \$10,000.00

7000-7200 POLYCHLORINATED BIPHENYLS (PCBs)

9802PL	Containerized Liquids/Multi-phase POLs (Recycling Required per CCR 66266.1) [see C.53]	75000	lb		
9802PR	Provide petroleum, oil and lubricant (POL) pumping, transportation and recycling, using a 2,500 gl truck [see C.53]	100	ea		
9802RR	Containerized Liquids/Multi-phase Fuels Blending (Recycling Required per CCR 66266.1) [see C.53]	37500	lb		
9804	Containerized Solids	50000	lb		
9804AB	Containerized Solids Alkaline Batteries (Recycling Required per CCR 66266.1) [see C.54 & C.62]	80000	lb		
9804AS	Containerized Solids Asbestos	25000	lb		
9804FA	Containerized Solids Oil Filters (Drained but wet) [see C.60]	90000	lb		
9804RR	Containerized Solids (Recycling Required), Non-PCB Ballasts	1000	lb		

9805	Aerosols	1000	lb		
9806	Bulk Liquids (pumpable)	150000	lb		
9806AZ	Provide Antifreeze pumping, transportation and recycling using a 2,500 gl truck [see C.55]	10	ea		
9807	Bulk Solids	255000	lb		
9807AA	Bulk Solids Disposal without transportation [see C.71]	20000	lb		
9807AS	Bulk Solids Asbestos	37500	lb		

9900-9999 NON-HAZARDOUS/DESIGNATED WASTES

CLIN	SERVICES/SUPPLIES	EST QTY	UNIT	UNIT PRICE	AMOUNT
9901	Small Containers [see C.36]	20000	lb		
9902	Containerized Liquids/Multi-phase	157500	lb		
9902LP	Containerized Liquids/Multi-phase (Latex Paint) [see C.59]	40000	lb		
9904	Containerized Solids	150000	lb		
9904FB	Containerized Solids Oil Filters (Drained and dry) [see C.60]	4000	lb		
9905	Aerosols	500	lb		
9905EA	Empty Aerosols for Recycling	500	lb		
9906	Bulk Liquids (pumpable)	1000	lb		
9907	Bulk Solids	500000	lb		

TOTAL BASE PERIOD \$_____

SAN DIEGO BID SCHEDULE
18-Month Option Period

6300-6599 SPECIAL REQUIREMENTS

CLIN	SERVICES/SUPPLIES	EST QTY	UNIT	UNIT PRICE	AMOUNT
6321	Provide and prepare Lab Packs, consisting of small quantity chemical items (55 gl) [see C.52]	10	ea		
6322	Provide and prepare Lab Packs, consisting of small quantity chemical items (20-30 gl) [see C.52]	10	ea		
6323	Provide and prepare Lab Packs, consisting of small quantity chemical items (5-15 gl) [see C.52]	8	ea		
6333	Expedited removal for 9000-series CLINs – 5 day [see C.51]	38	ea		
6335	Expedited removal for 9000-series CLINs – 1 day [see C.51]	8	ea		
6343	Expedited performance for 6000-series CLINs – 5 day [see C.51]	5	ea		
6345	Expedited performance for 6000-series CLINs – 1 day [see C.51]	3	ea		
6350	Tank Cleaning/Services (Above Ground) Mobilization cost [see C.46]	38	ea		
6351	Tank Cleaning/Services (Below Ground) Mobilization cost [see C.46]	22	ea		
6353	Tank Cleaning/Services (Plating Vats) Mobilization cost [see C.46]	3	ea		
6355	Tank Cleaning/Services (Other Pipes) Mobilization [see C.46 & C.76]	10	ea		
6356	Tank Cleaning/Services – Additional Mobilization cost – confined space entry [see C.46]	45	ea		
6357	Tank Cleaning Services – Additional Mobilization cost – Vactor/Eductor truck rental [see C.46]	300	hr		

6360	Personnel for cleaning/servicing of tanks, totes, oil/water separators, pipes – Team Leader [see C.46]	300	hr		
6361	Personnel for cleaning/servicing of tanks, totes, oil/water separators, pipes – Technician [see C.46]	300	hr		
6372	Storage container daily rental (20 cy) [see C.50]	450	dy		
6372AD	Storage container daily rental (20 cy sludge bin) [see C.50]	200	dy		
6375	Storage container daily rental (40 cy) [see C.50]	1200	dy		
6375AA	Storage container annual rental (20 cy) [see C.50]	5	ea		
6375BB	Storage container annual rental (40 cy) [see C.50]	5	ea		
6376DC	Drop Charge [see C.50]	63	ea		
6377	Provide overpack containers of various sizes [see C.78]				Cost Reimbursement Not to Exceed \$5,000.00
6388	Transportation charge (move containers on same installation) [see C.75]	15	ea		
6388AA	Transportation charge (return Government container from commercial disposal facility) [see C.75]	5000	mi		
6400	Perform appropriate analysis to properly identify unknown hazardous property and complete waste profile form	5	ea		
6401	Perform Hazardous Waste Characteristics Analysis to determine ignitability (D001), corrosivity (D002), reactivity (D003)	5	ea		
6403	Perform TCLP Metals analysis to determine 8 TCLP metals (D004-D011)	5	ea		

6413	Perform analysis to determine Halogenated Volatile Organics (EPA Method 8101)	5	ea		
6417	Test for semi-volatile organics as listed in 22 CCR 66268, Appendix III	5	ea		
6420	Perform the following tests: EPA 8080 PCBs and Organochlorine Pesticides; EPA 8140 Organophosphorous pesticides; EPA 8240 Volatile Organics; EPA 8270 Semi-Volatile Organics; EPA 9010 Cyanides; TCLP metals (8); CCR TTLC (17) metals. If results of TTLC are 10 times greater than STLC, then run STLC.	5	ea		
6421	Perform test for asbestos	5	ea		
6424	Perform Polychlorinated Biphenyl (PCB) analysis using EPA SW-846 method 8082	5	ea		
6500MM	Surcharge for disposal of high level mercury [see C.43]	25000	lb		
6502	Perform Management Services as described in clause C.78. May include (but not limited to) preparation of waste documentation, labeling and marking containers, waste transportation and/or pumping, spill response, internal and external reports, operate 90 day or CSF, etc [see C.78]	2000	hr		
6502BB	Perform Management Services as described in clause C.78b for puncturing of aerosol cans [see C.78]	500	hr		
6609ME	Supplies Reimbursement [see C.79]				Cost Reimbursement Not to Exceed \$10,000.00

7000-7200 POLYCHLORINATED BIPHENYLS (PCBs)

CLIN	SERVICES/SUPPLIES	EST QTY	UNIT	UNIT PRICE	AMOUNT
7000	Articles (other than transformers & capacitors) 500-4999 ppm PCB [see C.4]	6000	lb		
7002	Articles (other than transformers & capacitors) 50-499 ppm PCB [see C.4]	1000	lb		
7003	Articles (other than transformers & capacitors) 50-499 ppm PCB (drained) [see C.4]	250	lb		
7004	Articles (other than transformers & capacitors) less than 50 ppm PCB [see C.4]	900	lb		
7005	Articles (other than transformers & capacitors) less than 50 ppm PCB (drained) [see C.4]	250	lb		
7006	Mixed PCB items [see C.4]	750	lb		
7007	Transformers 500-4999 ppm PCB [see C.4]	1500	lb		
7008	Transformers 500-4999 ppm PCB (drained) [see C.4]	600	lb		
7009	Transformers 500-4999 ppm PCB (sealed) [see C.4]	500	lb		
7010	Transformers 50-499 ppm PCB [see C.4]	3000	lb		
7011	Transformers 50-499 ppm PCB (drained) [see C.4]	13500	lb		
7012	Transformers less than 50 ppm PCB [see C.4]	2250	lb		
7013	Transformers less than 50 ppm PCB (drained) [see C.4]	1500	lb		
7014	Small Capacitors 500-4999 ppm PCB [see C.4]	1500	lb		
7015	Large Capacitors 500-4999 ppm PCB [see C.4]	300	lb		
7023	Large Capacitors less than 50 ppm PCB [see C.4]	75	lb		
7028	Debris (example: rags, cans, drums, wood) PCB contaminated [see C.4]	12000	lb		

7029	Soil, any PCB concentration [see C.4]	500	lb		
7030	Liquid 500-4999 ppm PCB [see C.4]	500	lb		
7031	Liquid 50-499 ppm PCB [see C.4]	250	lb		
7032	Liquid less than 50 ppm PCB [see C.4]	18000	lb		
7033	Liquid and/or solid mixtures with PCBs <50 ppm, may be contaminated with (but not limited to) solvents, oils, water [see C.4]	100	lb		
7034	Liquid and/or solid mixtures with PCBs 50-499 ppm, may be contaminated with (but not limited to) solvents, oils, water [see C.4]	250	lb		
7035	Liquid and/or solid mixtures with PCBs 50-4999 ppm, may be contaminated with (but not limited to) solvents, oils, water [see C.4]	150	lb		
7036	PCB sludge \geq 500 ppm [see C.4]	100	lb		
7037	PCB contaminated sludge 50-499 ppm [see C.4]	100	lb		
7038	Sludge less than 50 ppm PCBs [see C.4]	100	lb		
7200	PCB contaminated packaging material – may include (but not limited to) wood, paper, plastic [see C.4]	100	lb		

**6601-6610PA, and 0812-0874AC COMPRESSED GAS CYLINDERS
6601-6610PA COMPRESSED GAS CYLINDERS SERVICES/SUPPLIES**

6601	Testing unknown compressed gas cylinders [see C.26]	5	ea		
6608	Perform appropriate analysis to properly identify the gas and complete waste profile form [see C.2.7 and C.2.10]	5	ea		

6609AA	Performs Management Services, may include repackaging the contents of one compressed gas cylinder that is not DoT transportable (non-inert gas) [see C.2.8]	5	ea		
6609BB	Perform Management Services, may include replacing a valve that is not operable [see C.2.8]	5	ea		
6610PA	Poison, Hazard Zone "A" surcharge [see C.2.9]	5	ea		

081x COMPRESSED GAS CYLINDER (INERT)

0812	Small cylinder (incl lecture bottle, cartridges) [see C.2]	20	ea		
0813	Medium cylinder	20	ea		
0814	Large cylinder	20	ea		

082x COMPRESSED GAS CYLINDER (OXIDIZER)

0822	Small cylinder (incl lecture bottle, cartridges)	20	ea		
0823	Medium Cylinder	20	ea		
0824	Large cylinder	20	ea		

083x COMPRESSED GAS CYLINDER (SILAN/PYROPHORIC)

0832	Small Cylinder (incl lecture bottle, cartridges)	3	Ea		
0833	Medium Cylinder	3	Ea		
0834	Large Cylinder	3	Ea		

084x COMPRESSED GAS CYLINDER (POISON)

0842	Small Cylinder (incl lecture bottle, cartridges)	10	Ea		
0843	Medium Cylinder	10	Ea		
0844	Large Cylinder	5	Ea		

085x COMPRESSED GAS CYLINDER (REFRIGERANT)

0852	Small Cylinder (incl lecture bottle, cartridges)	50	Ea		
0853	Medium cylinder	50	Ea		
0854	Large cylinder	25	Ea		

086x COMPRESSED GAS CYLINDER (CORROSIVE)

0862	Small cylinder (incl lecture bottle, cartridges)	10	Ea		
0863	Medium cylinder	10	Ea		
0864	Large cylinder	5	Ea		

087x COMPRESSED GAS CYLINDER (FLAMMABLE)

0872	Small cylinder (incl lecture bottle, cartridges)	50	Ea		
0872AC	Small cylinder (incl lecture bottle, cartridges), acetylene w/asbestos lining	10	Ea		
0873	Medium cylinder	50	Ea		
0873AC	Medium cylinder, acetylene w/asbestos lining	10	Ea		
0874	Large cylinder	50	Ea		
0874AC	Large cylinder, acetylene w/asbestos lining	10	Ea		

9100-9199 IGNITABLE WASTES [40 CFR 261.21] D001

CLIN	SERVICES/SUPPLIES	EST QTY	UNIT	UNIT PRICE	AMOUNT
9101	Small Containers [see C.36]	67500	Lb		
9101PP	Small Containers contaminated with PCB at or above regulated levels [see C.4 & C.36]	150	Lb		
9101RR	Small Containers, paints and adhesives [see C.36 & C.53]	70000	Lb		
9102	Containerized Liquids/Multi-phase	112500	lb		
9102CP	Containerized Liquids/Multi-phase, Miscellaneous Paint Waste (Recycling Required per CCR 66266.1) [see C.53]	375000	lb		
9102PP	Containerized Liquids/Multi-phase, contaminated with PCBs at or above regulated levels [see C.4]	500	lb		
9102RR	Containerized Liquids/Multi-phase (Recycling Required per CCR 66266.1) [see C.53]	30000	lb		
9104	Containerized Solids	150000	lb		
9104BA	Emergency Escape Breathing Apparatus	60000	lb		
9104FF	Containerized Solids, Fuel Filters	10000	lb		
9105	Aerosols	37500	lb		
9106	Bulk Liquids (pumpable)	250000	lb		
9106RR	Bulk Liquids (pumpable) (Fuels Blending) [see C.53]	250000	lb		
9107	Bulk Solids	1000000	lb		

9200-9299 CORROSIVE WASTES [40 CFR 261.22] D002

CLIN	SERVICES/SUPPLIES	EST QTY	UNIT	UNIT PRICE	AMOUNT
9201	Small Containers [see C.36]	20000	lb		
9201PP	Small Containers, contaminated with PCB at or above regulated levels [see C.4 & C.36]	150	lb		
9202	Containerized Liquids/Multi-Phase	75000	lb		
9202AC	Containerized Liquids/Multi-Phase Aqueous Acid Solutions	25000	lb		
9202AL	Containerized Liquids/Multi-Phase Aqueous Alkaline Solutions	30000	lb		
9202PP	Containerized Liquids/Multi-Phase contaminated with PCB at or above regulated levels [see C.4]	100	lb		
9204LA	Containerized Solids (Lead-Acid Batteries, Wet) [see C.56]	25000	lb		
9204MB	Containerized Solids, Mercury Batteries (Wet) [see C.54]	2500	Lb		
9204NC	Containerized Solids (NiCad Batteries, Wet) [see C.57]	15000	Lb		
9205	Aerosols	1000	Lb		
9206	Bulk Liquids (pumpable)	37500	Lb		

9300-9399 REACTIVE WASTES [40 CFR 261.23] D003

CLIN	SERVICES/SUPPLIES	EST QTY	UNIT	UNIT PRICE	AMOUNT

TOTAL OPTION PERIOD \$_____

TOTAL FOR BASE AND OPTION PERIOD \$_____

SECTION C

STATEMENT OF WORK

C.2 COMPRESSED GAS CYLINDERS

a. The contractor shall provide all services necessary for the assessment of all gas cylinders, the discharge of inert gases, the final treatment/disposal or recycling of the non-inert gases, and the decommissioning, cleansing and recycling of metal from emptied cylinders. These services shall be in accordance with all Federal, state, and local laws and regulations and all terms and conditions of this contract. Services shall include all necessary personnel, labor, equipment, transportation, packaging, detailed analysis, if required, for disposal and/or transportation including manifesting and completion of waste profile sheets, and compilation and submission of all documentation required by G.11. The Government is discarding all items listed in the schedule and some are considered hazardous waste. Cylinder disposal shall result in the destruction of the cylinder, such that it can no longer be used as a cylinder.

b. When the Government has information identifying contents, it is provided for information purposes only and is not a guarantee of the cylinder contents. A listed content does not relieve the contractor from the responsibility to ensure that the contents are correctly identified. The contractor is required to assess all compressed gas cylinders at the designated location and determine if they are inert and can be discharged to the atmosphere on site, or if they are non-inert and can be transported off-site for disposal/recycling. The contractor is authorized to re-valve cylinders in order to discharge gases or transport off-site as appropriate.

c. The contractor shall not remove any gas cylinders whose contents cannot be identified/confirmed or when no known disposal method is available. Sampling of contents for identification purposes only is authorized. The contractor is required to provide the COR written explanation for refusing any cylinders for processing (see Attachment IX). Refused cylinders must be identified by serial number or other identifiable markings or by a contractor/COR assigned identification number. This number must be identified in the written explanation refusal.

d. The contractor is required to discharge, dispose, or recycle the gas in accordance with DLAI 4145.25 at www.dlaps.hq.dla.mil/dlai/i4145.25.htm or requested from the COR. The contractor shall complete a certificate of disposal or a certificate of recycling for all gases and empty cylinders and furnish them as appropriate under G.11 and/or to the generator with a copy to the COR.

e. Cylinders will be assigned a CLIN based on their contents and the size of the cylinder. The valve on the gas cylinder is not to be included in determining the overall size of the cylinder (see Attachment IV).

f. The Government anticipates generating small numbers of cylinders during the life of this contract. The Government does not guarantee cylinders under each category will be ordered.

C.2.1 DISCHARGE INERT GASES

The contractor shall assess each cylinder to determine if the contents are inert. For the purposes of this contract inert gases are those not regulated by Federal, state, or local regulations as wastes or pollutants and shall be discharged to the atmosphere at the Government facility or may be transported to a TSDF for venting. The contractor is to complete the Compressed Gas Cylinder report (See Attachment VIII). If required by the COR, the contractor shall relocate the cylinder to a designated location in order to safely discharge the gases from the cylinder if discharged on-site. All proper safety precautions must be observed. When the cylinder is completely empty, the contractor shall decommission the cylinder in accordance with C.2.3 below. The contractor shall complete a Compressed Gas Cylinder report for each pickup location. Each cylinder will be recorded as required. If the contractor chooses to remove inert cylinders for venting off-site, all work described at C.2.3 shall be accomplished and the decommissioned cylinders shall be returned to the appropriate DRMO within 60 calendar days of removal. Prior to venting gases at Government facilities, the contractor shall coordinate through the COR with the Base Environmental Office. Cylinders containing inert gas that have inoperable valves may be vented with the use of a safety relief device in accordance with DLAR 4541.25, Section 7.7-2c. A copy of the Compressed Gas Cylinder report shall be provided to the COR prior to invoicing and in accordance with G.11.

Note: When the Government requires the contractor to remove inert gases by venting, either off-site or on-site, the contractor shall process emptied cylinders in accordance with C.2.3 and return the cylinder to the DRMO.

C.2.2 REMOVE AND DISPOSE OF NON-INERT GAS CYLINDERS

The contractor is required to assess each cylinder to determine if it contains/contained non-inert gases and if it is transportable. In accordance with 49 CFR, the contractor is required to transport off-site all non-inert compressed gas cylinders and those inert cylinders that cannot be disposed of in accordance with C.2.1 due to state and/or local laws and regulations. The contractor shall recycle the gas as fuel, process it for reuse, or neutralize/treat/dispose/incinerate the gas in accordance with DLAR 4145.25. Once emptied, the cylinders shall be cleansed, decommissioned and recycled for metallic content in accordance with

C.2.3. The contractor shall complete a Compressed Gas Cylinder report for each pickup location. Each cylinder will be recorded as required. In addition, the contractor will complete Certificates of Recycling for all gases, which are processed for reuse and used as fuel, or Certificates of Disposal for all gases disposed of by incineration or treatment/neutralization. A copy of the Compressed Gas Cylinder report and all required certificates shall be submitted to the generator in accordance with G.11.

C.2.3 DECOMMISSIONING OF EMPTIED CYLINDERS

The contractor shall take the following actions to process each cylinder containing identified non-inert gas or inert gas:

- a. Track every cylinder by serial number, CLIN, and delivery order number throughout the disposal process until each individual cylinder's contents are purged or the point of final release of each cylinder from the contractor's custody.
- b. Purge and cleanse all cylinders of their contents. For any purging of cylinders performed on Government premises, purged contents shall be removed using methods which will not constitute treatment (i.e., the characteristics of the gas will remain unchanged).
- c. Process/dispose of the contents of each cylinder. Contents will be discharged (as per C.1.2), recycled as fuel. Processed for reuse, neutralized, or incinerated in accordance with DLAR 4145.25. The contractor will provide Certificates of Recycling for all contents, which are processed for reuse or used as fuel to the generator. Certificates of Disposal will be provided to the generator for all contents, which are disposed of by neutralization or incineration.
- d. Empty all cylinders in accordance with all Federal, state, and local regulations. This process shall conform to both the requirements of 40 CFR 261.7 regarding management of containers previously containing residues of hazardous wastes and cleaning each cylinder of all residues and vapors to remove all potential hazards per 49 CFR 173.29. The contractor shall dispose of all rinsate/residues/hazardous wastes generated by this requirement at no additional cost to the Government.
- e. Return/place emptied cylinders which previously contained inert materials in an area designated by the COR, per C.2.1.
- f. Decommission/dispose of each cylinder, which contained non-inert materials. Prior to release by the contractor, the contractor shall obliterate all DoD identification markings present on every cylinder disposed of under this contract. For example, grinding or cutting out (with a cutting torch) may meet this requirement. The contractor shall dispose of each cylinder using one of the following methods:

1) Reutilization of cylinders, which meet the Department of Transportation criteria, for reuse. To utilize this method of disposal, each cylinder to be reused must be hydrostatically tested by a registered hydrostatic test facility. Copies of all test results for such cylinders will be provided as proof of reutilization IAW G.11 to the generator.

2) Smelting cylinders using a scrap metal recycler. Prior to smelting, the contractor shall de-valve the cylinder, mark/stamp the cylinder "CONDEMNED-SCRAP" and drill/puncture a hole, at least ½ inch in size through the cylinder. As an alternative to drilling or puncturing a hole, inlet threads shall be destroyed sufficiently to prevent installing a valve with a gas tight seal or the contractor may cut the cylinder in half. The contractor shall complete/provide certificates of disposal for all cylinders disposed of using this method to the generator. Cylinders too small for marking/stamping are required to be tagged or labeled with the words "CONDEMNED – SCRAP".

3) Burying cylinders in an approved landfill. Prior to burial, the contractor shall de-valve the cylinder, and mark/stamp the cylinder "EMPTY." The contractor shall complete/provide certificates of disposal for all cylinders disposed of using this method to the generator.

Note: This is the only method acceptable for disposal of asbestos containing non-inert cylinders. Example: Acetylene cylinders, which contain asbestos, are NOT reusable.

4) Any alternative proposed by the contractor that receives the written approval of the Contracting Officer. Approval must be obtained prior to contractor disposal using alternative methods.

C.2.4 ACCIDENTAL GAS EMISSIONS

The contractor is solely responsible for any and all atmospheric releases of gas occurring during or resulting from performance of this contract. The contractor agrees to reimburse the U.S. Government any and all costs incurred for accidents resulting from improper handling, gas extraction, grinding, drilling, torching, etc., of any cylinders.

C.2.5 PERFORMANCE ON GOVERNMENT PREMISES

Treatment, disposal, or release of gas (other than inert) to the atmosphere on Government premises is not permitted by this contract. The contractor may perform gas extraction for other than inert gas cylinders at the pickup location using self-contained apparatus. This apparatus shall emit no gas into the atmosphere, and purge the entire cylinder contents into a closed receiver for transport to a recycling or disposal site.

C.2.6 EVALUATION/IDENTIFICATION OF CYLINDERS – CLIN 6601

Some cylinders contain unknown contents, may have inoperable valves or may be plugged or may not be DoT transportable due to their condition. When ordered by written task order citing CLIN 6601, the contractor is required to perform an evaluation of the cylinders on site and provide the results of the evaluation. This evaluation includes, but is not limited to, a visual inspection of markings, labels, cylinder types, etc., as well as condition of the cylinder for transport and to determine the condition of the valves (operable/inoperable). The contractor shall provide a copy to the COR of the completed Compressed Gas Cylinder report, Attachment VIII. This report will indicate, among other things, whether sampling and analysis (CLIN 6608) will be required to identify the contents and whether the contents need to be recontainerized (CLIN 6609AA). The contractor shall have fifteen (15) calendar days from issuance of a written task order citing CLIN 6601 to complete the evaluation and submit the report to the COR. A copy of the report shall be submitted prior to the invoices in accordance with G.11.

C.2.8 RECONTAINERIZATION/REPLACEMENT OF VALVE – CLINs 6609AA & 6609BB

When CLIN 6609AA is ordered, the contractor shall be required to recontainerize cylinders containing either inert or non-inert or unknown gas when the cylinder has been determined to be non-transportable. Recontainerizing may include (but is not limited to) removing gas from one cylinder and placing it into another DOT approved cylinder/container. Cylinders may either have a valve (operable/inoperable) or a plug in place. When CLIN 6609BB is ordered, the contractor shall be required to replace an inoperable valve. The contractor shall have fifteen (15) calendar days from issuance of a written delivery order to complete the recontainerization and/or valve replacement. When the gas is an unknown and there is no other means of extracting a sample for analysis, the Government will order analysis under CLIN 6608 at the same time as the recontainerization. In this instance the contractor shall be required to complete all tasks associated with both CLINs 6609AA and/or 6609BB and CLIN 6608 within fifteen (15) calendar days. All actions taken by the contractor resulting from recontainerization may either be transported off-site, cleansed and recycled to a scrap metal recycler by the contractor; or cleansed on-site (inerts only) and placed in an area designated by the COR. In either case, the contractor is required to remove all DoD identification markings and puncture a hole in the cylinder.

C.2.9 SURCHARGE FOR ZONE “A” POISON GASES – CLIN 6610PA

CLIN 6610PA will be ordered if any poison gases assigned hazard zone “A” (see 49 CFR 173.116) are included on a delivery order. One each CLIN 6610PA will

be ordered per delivery order if any gases on the delivery order are classified as poison hazard zone "A" and require a dedicated truck for removal.

C.2.10 PERFORM ANALYSIS – CLIN 6608

- a. The Contractor shall provide all services, property, supplies, furnishings and equipment necessary to conduct the required test(s) of Government selected items. The requested analysis is required for purposes of waste identification. The testing is in this contract to service generators on this contract. It is not intended to supplant the Contractor obligations designated elsewhere in this contract.
- b. The Government will order this service using CLIN 6608 (unit of issue is "each") on a task order. One each equals one waste stream to be analyzed by the Contractor. The Contractor shall perform the following:
 - (1) Samples shall be taken and testing performed in accordance with 40 CFR Part 261, Appendices I, II and III.
 - (2) It is the responsibility of the Contractor to transport samples from the pickup point to the analytical laboratory. All transportation of hazardous waste shall be in accordance with 49 CFR Parts 171–179 and 40 CFR Parts 261–263. The Contractor shall also comply with state and local regulations including requirements to obtain all necessary permits, licenses and approvals. The Contractor must complete a chain of custody form for each sample taken. Completed forms must be provided to the COR along with the analytical data.
 - (3) The Contractor shall provide a statement from the testing laboratory that the entire sample was used in the analysis in accordance with G.11. If there is additional sample left over after analysis; the Contractor is responsible for its disposal. The disposal of test samples shall be in accordance with all applicable Federal, state, and local laws and regulations.

c. Original analytical data and chain of custody forms will be provided to the COR within fifteen (15) calendar days of issuance of a written task order.

C.3 STATEMENT OF WORK

- a. The Government agrees that all hazardous property placed on task order(s) on this contract will be accompanied by documentation and markings that comply with all applicable local, state, and Federal laws and regulations relating to the generation and storage of hazardous property.
- b. The contractor agrees to provide all services necessary for the final treatment/disposal of the hazardous property including polychlorinated biphenyls (PCBs) and compressed gas cylinders, listed in the schedule in accordance with

all local, state, and Federal laws and regulations, and the terms and conditions of this contract. These services shall include all necessary personnel, labor, transportation, packaging, equipment, and the compilation and submission of all documentation required by G.11. Contract Line Item Numbers (CLINs) 9100 through 9899, regardless of their condition, are being discarded by the Government and are considered to be hazardous waste. CLINs 9900 through 9999 are not considered to be state or Federal regulated hazardous waste.

c. Any shipments outside the United States must comply with all international agreements and all applicable foreign laws. If the contractor will be exporting directly from the Department of Defense (DoD) activity, the contractor is required to provide a current copy of the Acknowledgment(s) of Consent to the Contracting Officer Representative (COR) with the shipping documentation in accordance with C.15. The contractor may not ship waste outside of the United States to circumvent Environmental Protection Agency (EPA) land disposal restrictions as cited in 40 CFR 268.

When Management Services CLINs are ordered, the Contractor shall provide support to the base for all Resource Conservation and Recovery Act (RCRA), non-RCRA hazardous wastes, special wastes, (including Universal Wastes, PCBs, Asbestos Containing Material, Clean-Up Wastes), recyclable materials and other materials sited in the host's Hazardous Waste Management Plan. (HWMP shall be furnished when requested through the COR).

All D001 wastes, except high total organic carbon (TOC) wastes, all D002 wastes, D003 wastes, except reactive cyanides, D005-D043 wastes should be managed in a Clean Water Act (CWA), CWA equivalent or Class I Safe Drinking Water Act (SDWA) system. As an alternative for D001 wastes, they may be treated according to the best-demonstrated available technologies (BDATS) or recovery of organics (RORGS) or combustion (CMBST). If the contractor chooses to dispose of wastes at a non-CWA/SDWA facility, the Contractor shall be responsible for analyzing for 40 CFR 268 regulated constituents **prior to removal**.

d. All recycling CLINs are the Government's estimates and are based on the best information available. The contractor will be required to dispose of all resulting solid wastes in accordance with all local, state, and Federal regulations. If a waste designated for recycling does not meet the recycling facility's required parameters, the contractor must notify the Contracting Officer (CO), in writing, of the rationale and proof for waste rejection. If the Government concurs, the applicable disposal CLIN for the waste will be assigned. (also See C.73)

C.4 DISPOSAL OF POLYCHLORINATED BIPHENYLS (PCB), PCB CONTAMINATED AND NON-PCB MATERIAL 7000 Series CLINs (4/9/02)

The contractor agrees to provide all services necessary for the disposal of PCB, PCB contaminated and non-PCB material listed in the schedule. These services shall include all necessary personnel, labor, transportation, packaging, and the compilation and submission of all documentation required by G.11. All PCB, PCB contaminated and non-PCB material under this contract shall be transported and disposed of within the continental United States (except for such outside transportation and disposal as would be required for all pickup sites located outside the continental United States). All PCB, PCB contaminated and non-PCB material shall be disposed of in accordance with EPA guidelines in 40 CFR Part 761 entitled "Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions." However, for purposes of this contract, all PCB, PCB contaminated and non-PCB material will be disposed of in accordance with paragraphs (b) and (c) below. The contractor is cautioned that he is solely responsible to ascertain the extent to which 40 CFR Part 761 affects the operations resulting from this solicitation and to comply therewith.

(a) PCB retrogrades will not be offered on this contract.

(b) DISPOSAL METHODS: The contractor shall dispose of all items in a manner which is in conformity with 40 CFR 761.60 and its referenced parts, except for those methods in said regulation which would result in use, reuse or recycling of the contract property and items requiring demilitarization by burial, as discussed below. The only method approved which will allow for use, reuse or recycling is identified in paragraph (c) below. EPA and other government agencies shall approve methods of disposal and disposal facilities. The contractor shall provide a complete audit trail of those CLINs being recycled or disposed of. The contractor is to provide a complete list of facilities performing detoxification and disposal, as well as those facilities receiving the recycled materials/metals. Letters of Agreement must indicate the recipient of the recycled materials has a total knowledge of the material being accepted, i.e., the material has been recycled for PCB laden items, articles, transformers, capacitors, etc.. All rinsate (from containers) is to be collected, detoxified, incinerated or landfilled. Containers which cannot be recycled are to be triple rinsed and either landfilled or incinerated in a facility approved for PCB disposal.

Facilities approved by the EPA to distill/detoxify, requires the contractor to document this fact and obtain DRMS approval prior to the initiation of either of these processes.

Certificates of Disposal/Destruction for PCB bearing property shall be provided to the activity as listed in BLOCK 3 of the Hazardous Waste Manifest from the prime contractor, within 30 days from date of PCB destruction. The prime contractor shall return Certificates of Disposal/Destruction for all items listed on the original manifest to the generator and COR. This includes items sent to subcontractors for destruction and/or recycling (see below). This is in addition to the requirements of G.11. The report must show a direct link between Disposal/Destruction items and the original manifest they were listed on. Example: the manifest number and line item number should be used on the report for easy tracking.

(c) ALTERNATE DISPOSAL METHOD:

(1) "Total Destruction" may be utilized for the disposal of all PCB materials when the disposal facility has the necessary local, state, and Federal environmental licenses and is an environmentally responsible and permitted recovery center.

(2) Contractors choosing to dispose of all materials by "total destruction" shall:

(i) Dismantle all transformers and items for separation into components.

(ii) Incinerate all liquids and all non-metallic solids in accordance with 40 CFR 761.70.

(iii) Complete secondary cleaning of all metals for removal of PCBs prior to smelting for recycling.

(d) Defense Reutilization and Marketing Service (DRMS) reserves the right to inspect facility processes for the alternate disposal method prior to their approval.

(e) CERTIFICATE OF RECYCLING

For items that are recycled, either by ordered CLIN or by choice of the contractor, a Certificate of Recycling will be issued to the agency listed in BLOCK THREE of the Hazardous Waste Manifest, as well as accompany the invoice for payment. Certificates of Recycling will list the entire audit trail of the material being recycled. This will include the facility receiving the detoxified liquids (mineral oil), and /or the facility receiving any metals, or other matter derived from the breakdown of any CLINs.

(f) CERTIFICATE OF DISPOSAL

A Certificate of Disposal must accompany the documentation stated in G.11 listing all disposal methods, which will include the method(s) of disposal and destruction, e.g., T07 (Incineration), D80 (Landfill). Should any recycled CLINs require its by-product to either be incinerated or landfilled, a Certificate of Disposal must accompany the Certificate of Recycling. For example; if 10,000 gallons of PCB liquid is dechlorinated, and 10 pounds of residue remains as a product, a Certificate of Recycling will be issued for the liquid, and a Certificate of Disposal for the 10 pounds of product residue.

NOTES: RCRA Hazardous Waste contaminated with PCBs at or above the regulated levels shall be ordered from the 9000 series CLINs with a PP suffix. The contractor shall ensure that all PCB waste at concentrations of 50 ppm or greater is disposed of in a timely manner in accordance with 40 CFR part 761.65.

C.5 DEPARTMENT OF TRANSPORTATION REQUIREMENTS
(4/11/03)

The contractor will comply with, and ensure that all applicable subcontractors comply with, all requirements of United States Department of Transportation (DoT) regulations, 49 CFR Parts 100-199, regarding waste transportation under this contract. Complete compliance with these regulations shall include, but not be limited to, ensuring that emergency response information is carried on transport vehicles and maintained at facilities where hazardous materials are received, stored, or handled during transportation, and security requirements under 49 CFR Part 172 are complete. Shipping papers will contain an emergency response telephone number supplied by the disposal contractor which is monitored 24 hours a day in order to provide immediate, detailed emergency response information to personnel reacting to emergencies. Technical names will be included in the descriptions of materials reflected on shipping papers by "not otherwise specified" (n.o.s.) descriptions. Definitions of the terms used in this clause are those used in 49 CFR 100-199.

C.6 SPILL RESPONSIBILITY

a. The contractor is solely responsible for any and all spills or leaks during the performance of this contract that occur as a result of or are contributed to by the actions of its agents, employees, or subcontractors. The contractor agrees to clean up such spills or leaks to the satisfaction of the Government and in a manner that complies with applicable local, state, and Federal laws and regulations. The clean up shall be at no cost to the Government.

b. The contractor shall report all such spills or leaks, regardless of their quantity, to the CO immediately upon discovery. A written follow-up report shall be submitted to the CO not later than 24 hours after the initial telephonic report. The written report shall be in narrative form and as a minimum include the following:

(1) Description of item spilled (including identity, quantity, manifest no., etc).

(2) Whether amount spilled is EPA/state reportable, and if so whether it was reported.

(3) Exact time and location of spill including a description of the area involved.

(4) Containment procedures initiated.

(5) Summary of any communications contractor has with press or Government officials other than the CO.

(6) Description of clean-up procedures employed or to be employed at the site including disposal location of spill residue.

C.7 SAFETY

The contractor must perform all operations in a prudent, conscientious, safe and professional manner. At a minimum, contractor's personnel and equipment shall comply with applicable installation, local, state, and Federal laws, safety regulations and procedures, and contractor will ensure that its agents, employees, and subcontractors perform in a safe manner. The contractor shall ensure that all personnel involved in handling and packaging the hazardous waste be trained for the level of expertise required for the proper performance of the task and, in particular, in the areas of chemical incompatibility, general first aid procedures, and spills. Handling and Personnel Protective Equipment (PPE) shall be provided by the contractor and must be appropriate to ensure safe handling of the hazardous waste. When operating within an EPA or state permitted DoD Hazardous Waste (HW) storage facility, the contractor is required to use forklifts with specifications that meet the applicable permit requirements. When operating at a non-permitted DoD HW storage facility, the contractors are required to use only DY, EE, or EX rated forklifts to traverse through or within fifty (50) feet of flammable property as defined by Occupational Safety and Health Administration (OSHA). The contractor agrees that his personnel and equipment are subject to safety inspections by Government personnel while on Federal property.

C.9 NOTIFICATIONS (2 / 02)

a. Except as may otherwise be specified herein, the contractor shall notify the COR for each location, at least three (3) business days BEFORE attempting site visits, analysis or pickups.

(1) In addition to the notification above for pickups, the contractor shall provide the name of the driver, the driver's Commercial Driver's License (CDL) number and its expiration date to the COR or other Government representative at least 24-hours prior to removal. The contractor may also opt to provide a list of approved, multiple drivers designated for pickups under this specific contract to the COR or other Government representative prior to any attempted removals. If this option is elected and the list is approved by the Government and maintained by the Contractor, the 24-hour notification requirement is moot for the remainder of the contract unless otherwise modified.

(2) If a driver, other than the one specified 24-hours in advance for the specific Task Order; or, one whose name does not appear on the optional list of approved, multiple drivers arrive for pickup, the COR or other designated Government representative will verify the personnel switch with the prime contractor before the pickup commences. This may require a written notice or fax from the prime contractor.

b. The Government reserves the right to take appropriate action, such as the pursuit of monetary consideration and/or annotation of negative past performance if the contractor fails to meet the above applicable notification timeframes and/or a different driver, other than the one previously identified under this notification requirement or whose name does not appear on the list of approved, multiple drivers, arrive at the pickup location(s).

c. For Task Orders (TO) containing Expedited Removals, Services or Performance CLINs the contractor shall notify the COR or other Government representative for each location, in the following timeframes BEFORE attempting site visits, analysis, or pickups: 15-10 day expedites – at least 3 days; 9-5 day expedites – at least 2 days; and 4 or less day expedites – at least 1 day. In addition, the contractor is still required to provide the information identified in paragraph (1) above at least 24-hours prior to removal. If applicable, any removals ordered under a 24-hour or one business day expedited CLIN requires the contractor to provide the information identified in paragraph (1) at least 4 hours prior to pickups if the contractor elects to provide the identity of the driver for each specific task order. If the contractor elects to provide the list of approved, multiple drivers designated for use under this contract, this expedited notification is not required. All other terms and conditions stated elsewhere within this clause apply to any of the aforementioned Expedited Removals, Services or Performance CLINs.

C.10 PERMITS / SPECIAL REQUIREMENTS (3 / 26 / 03)

a. The contractor shall, without additional expense to the Government, be responsible for preparing or obtaining any necessary licenses, permits, notifications, waste profiles, or reports which result from a contractor's transportation, recycling, or disposal decision, so that the licenses, permits, etc. comply with any applicable international, Federal, state, and local laws, codes, and regulations in connection with the performance of the work. This includes acquiring any required permits or registrations necessary to operate on any installation listed in this contract and completing the Notification of Regulated Waste Activity form for the generator(s) of hazardous waste to sign and file with the applicable state regulators for waste disposal. This includes signing (on behalf of the Government) waste profiles requested by Treatment Storage Disposal Facilities. All contractor signed waste profile sheets shall be written for the actual waste stream using the generator's profile for backup documentation. All generator forms or other means of notifications including correspondence with Federal or State agencies on behalf of a generator must be coordinated with and concurred with by the affected generator prior to submission to any Federal or State agency.

b. The Contractor may be required to attend any special required training, seminar, instruction, class, etc. to perform work or gain access to the installation provided by the Government. Example: pass and ID requirements, antiterrorist training, fork lift training.

C.13 DEFINITION OF FINAL TREATMENT/DISPOSAL/RECYCLING

a. For CLINs 9100 through 9899, final treatment means treatment by a Resource Conservation and Recovery Act (RCRA) handling method specified in 40 CFR Parts 264/265, appendix 1, table 2, paragraph 2. Final disposal means disposal of a waste by a RCRA handling method specified in 40 CFR, parts 264/265, appendix 1, table 2, paragraph 3.

(1) The following does not constitute final treatment/disposal:

(a) Declaring RCRA/state regulated hazardous waste CLINs as RCRA-exempt as a result of management practices specified in 40 CFR 266 and 279;

(b) Interim treatment of the waste such that the waste still meets the definition of a hazardous waste as defined in 40 CFR 261 et. seq.

(2) All facilities used for interim treatment, final treatment or final disposal of items on this contract shall have as a minimum, an EPA/state approved interim status permit showing EPA hazardous waste numbers described in 40 CFR 261, subparts C and D, for each waste the facility is permitted to handle. An audit trail

must be provided for all RCRA/State regulated hazardous waste until treatment and/or processing renders the wastes non-RCRA or until final disposal is accomplished. Waste handling codes that describe methods of storage do not meet the definition of final treatment nor final disposal under this contract.

b. For CLINs 9900 through 9999, final treatment means processing at a facility that is appropriately licensed/permitted by local and/or state agency to accept the material. Final disposal means processing the waste in a facility that is approved for such by the appropriate regulatory authorities which includes drum reconditioning, medical incineration, waste water treatment facilities, etc. If long-term interment is the selected method of disposal, as a minimum, an EPA/state permitted facility with a textile liner, leachate collection system, and ground water monitoring must be used. An audit trail must be provided for all non-RCRA/non-state regulated **hazardous** waste until final disposal, as defined above, is accomplished.

(1) RCRA treatments, Chemical Fixation (T21) and Encapsulation (T39), when performed on CLINs 9900 through 9999 prior to landfill, are considered final processing/final disposal.

c. Recycling, if required by the Government, is defined in specific clauses located within section C of this contract. However, the contractor may elect to beneficially use, re-use, recycle or reclaim any waste in this contract, unless specifically listed otherwise in the contract. The following applies for all waste removed under this contract that is beneficially used, re-used, recycled or reclaimed:

(1) The contractor is required to use the firms on the Qualified Facility List or Qualified Transporter List, respectively, for any beneficial use, re-use, recycling or reclaiming of wastes. This includes any facility that may receive any waste removed under this contract, or a component thereof, at a stage where it remains a RCRA regulated waste, as defined in 40 CFR 261 et. seq.

(2) An audit trail must be provided to the facility that will beneficially use, re-use, recycle or reclaim the waste, or any component thereof, even if the waste/component can be managed as a hazardous material.

(3) Dilution in the recycling process, to include blending down, of hazardous waste contaminants is prohibited.

(4) Applicable Certificates of Recycling shall be attached to the Manifest Tracking Log, DRMS form 1683, and submitted in accordance with G.11.

d. It is the contractor's responsibility to ensure that waste is recycled or disposed of in accordance with the timeframes specified in Clause F.3.

C.15 SHIPPING DOCUMENTATION

a. A uniform hazardous waste manifest is required for the removal from Government premises of all CLINs 9100 through 9899 of the bid schedule. When applicable the contractor shall use a uniform hazardous waste continuation sheet. Waste designated for disposal/recycling in accordance with 40 CFR 266, 273 or 279 may not require use of a Uniform Hazardous Waste Manifest, only an appropriate shipping paper. All references to manifests in this provision relate to the "appropriate shipping paper". The contractor shall obtain and prepare all manifests, Hazardous Waste Profile Sheets required for acceptance of waste into a Qualified Facility, land disposal restriction notifications, and any other shipping documents. The contractor shall provide the COR with a copy of the completed form(s) and a complete 1155, including handling codes in 40 CFR 264 Appendix I Table 2 for each manifest line, for review by the appropriate Government official at least (3) business days prior to removal. Prior to removal from a site identified as a pickup point in this contract, completed copies of all manifests and supporting documents to include, but not limited to, a completed DD1155, and land disposal restriction notification forms (LDR) shall be furnished to the Defense Reutilization and Marketing office (DRMO) coordinating the waste disposal. Each pickup manifest (i.e., with a Government activity identified as a generator), as well as all other documentation required herein, shall be clearly and distinctly marked with the name of the servicing DRMO in addition to the generators and the contract and task order number, as applicable. If blocks are not provided, this information shall be placed in the upper, right-hand corner of each document.

b. A copy of all manifests, signed by the designated Transfer Storage and Disposal Facility (TSDF), shall be furnished directly to the generator whose address appears on the manifest(s) **and to the DRMO coordinating the waste disposal**, within the timeframes prescribed by 40 CFR 262.42(a)(2), or state equivalent. This manifest shall be furnished within the timeframe prescribed by 40CFR 262.42 or state equivalent, after receipt by the facility. As specified in 40 CFR 262.20(d) or 40 CFR 761.207(h) as applicable, if the contractor is unable to deliver the hazardous property to the designated or alternate facility on the manifest, the cognizant COR will be contacted for disposition instructions.

c. CLINs 9900 through 9999 of the bid schedule must be transported in accordance with DoT requirements. This includes the requirements that all hazardous materials offered for transportation be properly described on a bill of lading. The contractor shall obtain and prepare all bills of lading. In accordance with provision G.11, completed copies of all bills of lading shall be furnished to the Defense Reutilization and Marketing Office whose address appears on the bill of lading. Each bill of lading required herein shall be marked with the contract number and task order number as applicable.

d. The DRMS created dummy EPA number for non-RCRA TSDF, must be entered on all applicable shipping documentation such as nonhazardous waste manifests and bills of lading. Also, include DRMS created dummy EPA number on HQ DRMS Form 1683, Manifest Tracking Log.

Note: "Universal Waste" (UW) includes batteries, some pesticides and mercury thermostats as defined under Part 273. It also includes state-designated universal wastes, such as fluorescent light tubes. The UW Rule, Part 273, does not require the use of a hazardous waste manifest to ship UW within, to, or through a state that has adopted the UW Rule. Whenever UW is transported from, to, or through a state that has not adopted the UW Rule, a hazardous waste manifest will be used. The Contractor will designate on the manifest in block J when UW is being transported.

The regulations allow the generator to make the determination about whether to handle these specific wastes as UW under Part 273 or as hazardous waste under other parts of RCRA. The contractor will be advised on the task order if the wastes are to be handled as UW.

e. Contractor shall record waste category, or profile number, associated with each line item in block J of the outgoing manifest.

C.18 SEGREGATION OF HAZARDOUS WASTE

All items collected on this contract must be segregated and kept physically separate from any other items until the initial TSDF is reached. The items must be so marked, that they are readily identified to this contract throughout this period. In addition, the contractor must ensure that there is a clear audit trail for all items until final treatment/disposal is accomplished.

C.19 STATEMENT ON CONTAINERS

The Government does not warrant that the drums or containers offered for recycling/disposal are suitable for transportation in accordance with Department of Transportation regulations. If items are not packaged in accordance with DoT standards, then the Contractor must repackage using the appropriate repackage CLINs. Repackage CLINs will not be ordered to facilitate acceptance at a TSDF. Any securing cushioning and/or absorbent material required is the responsibility of the Contractor. The authorized Government representative will make the repackaging on site determination. The contractor shall accept the Government's container size unless the Contractor demonstrates the authorized Government representative, prior to commencing the packaging/repackaging, that a different size container(s) is required. The offeror is cautioned to ascertain and assess the need for overpacking or recontainerizing based on the site visit.

If any multiple overpacking, labeling, or grouping of containers is performed by the Contractor, the contractor must document the outside of the container(s) with the Turn-In Document number and any applicable generator container identification number.

c. NOTE: Labpacking services ordered by the government to facilitate turn-in to the DRMO will be ordered under the appropriate CLIN. See clause C.52 LABPACKING SERVICES.

C.20 GOVERNMENT EQUIPMENT AND PERSONNEL (2/1/01)

The Government shall not furnish any equipment or personnel to assist the contractor in the performance of the contractor's responsibilities under the contract. The contractor understands that any such offers of assistance are unauthorized, and the Contractor shall not accept any such offers. The only exception is the use of Government owned loading equipment (clause C.33), and Government owned scales (clause C.34), where applicable and management services (clause C.78).

C.21 TRAILER SECURITY, PADLOCKS (4/11/03)

a. All contractor trailers and tankers capable of being padlocked must be padlocked upon arrival at the pickup location. Failure to meet this requirement could result in the Government's halting of the pickup. All trailers and tankers capable of being padlocked must also be padlocked again prior to departure of the pickup location(s). The driver shall provide the padlock and lock the trailer or tanker without assistance from the COR or other Government representative.

b. The COR or other Government representative has the right to request any identification and/or occupational endorsements from the driver beyond what is identified in clause C.9 and refuse commencement and/or completion of pickups if any unusual or suspicious actions occur. Any potential demurrage associated with the driver verification process and/or the unexpected halt or commencement of pickups will not be grounds for reimbursement by the Government.

c. The Government reserves the right to take appropriate action, such as the pursuit of monetary consideration and/or annotation of negative past performance if the contractor has a trailer or tanker capable of being padlocked arrives and/or departs from the pickup location(s) without meeting the padlock requirements mentioned above and/or refuses to cooperate with any requests for additional identification and/or professional endorsements.

C.22 DETAILED ANALYSIS

If the contractor must perform detailed analysis for disposal, copies of the results identified to a specific contract line item shall be provided to the COR. Any detailed analysis must comply with all Federal, state and local requirements.

C.24 TREATMENT OF HAZARDOUS WASTE ON GOVERNMENT FACILITY

a. Treatment of hazardous waste (including solidification) on Government facilities is not permitted. Treatment is defined as any process which meets the definition of treatment as set forth in applicable local, state, and Federal (including 40 CFR 260.10) laws and regulations.

b. The contractor shall not drain and/or flush PCB items at Government installations. Draining will be allowed only to prevent leaking and to meet DoT regulations.

C.28 LAND DISPOSAL IN TEXAS

The contractor shall perform all dry weight computations for those hazardous wastes destined for land disposal in Texas and shall provide all such computations to the COR for record keeping purposes. This computation shall be furnished along with the copy of the generator manifest.

C.29 HOURS OF OPERATION

The contractor agrees that, for those portions of the services provided on a government installation, the services will be provided during the normal hours of operations for each installation. The normal hours of operations for installations on this contract are available, upon request, from the COR. **Due to unforeseen circumstances, i.e., military maneuvers, ThreatCons, safety inspections, the Contractor should contact the COR before pickups.**

There are special permit conditions, which dictate the hours of operation at Naval Air Station North Island and Naval Station San Diego (32nd Street). These conditions are:

Naval Base Coronado – The on-site receipt or off-site shipment of waste is prohibited from 0700 to 0800 and from 1600 to 1700 daily. Additionally, the City of Coronado has specified certain routes that shall be used for such shipments. The State of California Department of Toxics Substances Control requires that the Navy notify all waste transporters and include in their contract the transportation restrictions stated above. The approved transportation route as provided by the City of Coronado is Attachment.....

Naval Bases San Diego (32nd Street) – For the on-site receipt or off-site shipment of hazardous waste, transporters must enter or exit Interstate 5 at the 8th Street or Main Street off-ramps (except for emergencies) in National City. The following streets may be used to access the base:

Harbor Drive

Roosevelt Avenue, between 8th and Main Street

Twenty-Eighth Street between Harbor Drive and Interstate 5

Thirty-second Street between the Naval Station Main Gate and Norman Scott Road

Eighth Street between Harbor Drive and Roosevelt Avenue

Haulers must refrain from transporting Hazardous Waste to or from the Naval Station, San Diego (32nd Street Naval Station) during the following times:

Monday through Friday from 0715 to 0830

Monday, Tuesday, Wednesday, and Friday from 1400 to 1500

Thursday from 1300 to 1430

c. Naval Air Depot, NAS North Island operates from 7:00 a.m. until 2:00 p.m. only.

C.31 RCRA VS NON-RCRA CLINS

a. Items identified under CLINs 9100 through 9899 have been declared hazardous waste by the Government and are subject to stricter disposal requirements than CLINs 9900 through 9999.

b. CLINs 9900 through 9999 are waste not regulated by RCRA or regulated by the state of generation as hazardous waste and will be subject to less stringent requirements than CLINs 9100 through 9899.

c. If the contractor demonstrates through lab analysis and/or other supporting documentation that a CLIN(s) identified under CLINs 9100 through 9899 is not a RCRA/state regulated hazardous waste, the Government may so reclassify the item and place it under CLINs 9900 through 9999. The Government will review the lab analysis and other supporting documentation in a reasonable time period; however, the items in question will be treated as a hazardous waste in the interim and removal timeframes must be met.

d. If the contractor demonstrates through lab analysis and/or other supporting documentation that a CLIN(s) identified under CLINs 9900 through 9999 is a RCRA/state regulated hazardous waste, the Government may reclassify the item under CLINs 9100 through 9899. The Government shall treat the contractor's claim that a CLIN identified under CLINs 9900 through 9999 is actually a

hazardous waste, which should be identified under CLINs 9100 through 9899, as potential misidentification. The CLIN(s) in question shall not be removed, treated or disposed of until the Government has made a determination on the matter. Reclassification of items from CLINs 9100 through 9899 to CLINs 9900 through 9999, or from CLINs 9900 through 9999 to CLINs 9100 through 9899 shall fall under the "Changes" clause of this contract.

e. Any items identified under CLINs 9800 through 9899, which is a state regulated hazardous waste, only (not a RCRA waste) may be taken to a non-RCRA facility approved by the state for that specific state regulated hazardous waste if the non-RCRA facility is listed on the Qualified Facilities List.

C.33 LOADING

a. The contractor is responsible for loading, including furnishing all the equipment necessary for loading. If requested by the Generator, the Contractor shall provide pallets as needed for transportation to the Contractor-selected TSDF. The Generator may choose to retain Government-owned pallets if needed for future waste storage and handling at the Generator facility. The government will tailgate load drums, bags, and boxes (non-bulk) at the following locations:

- Facilities operated by Navy Public Works Center on NAS North Island; Naval Station San Diego; Point Loma Naval Complex; MCAS Miramar, Naval Amphibious Base, and Marine Corps Recruit Depot.
- DRMO operated facilities at NOLF Imperial Beach and 32nd St Recycling Center.
- Naval Aviation Depot Facility, PS-69
- NAF El Centro, B504

b. Unless otherwise provided in the contract, loading will not be performed on Saturdays, Sundays, Federal holidays, or any day that the installation where the items are located is closed. Where it is provided that the Government will load, the Government will make the initial placement of the item on conveyance(s) furnished by the contractor and the initial placement on the contractor's conveyance shall be as determined by the Government. All sites unless listed above, require the Contractor to furnish forklifts. The Government will not load bulk waste with the exception of solids loaded into rolloff containers by the generator. Unless otherwise provided in the contract, the Government will not block, chock, brace, lash, band, or in any other manner secure the cargo on such conveyance(s) furnished by the contractor.

C.34 WEIGHING OF PROPERTY

The contractor shall weigh all property before removal. An authorized Government representative will witness all weighing that occurs on site. The weight, agreed upon by both the contractor and the Government representative at the time of removal, will be the basis for payment to the contractor. Unsubstantiated charges for subsequent increases in weight, after removal from Government custody, will be the responsibility of the contractor.

a. Bulk Items

(1) Bulk items will be measured by one of the following methods. The method used will be whichever is most accurate and agreed upon by the contractor and the Government representative:

(i) Actual weight using Government scales.

(ii) Actual weight using commercial scales.

(iii) Calculated weight. As an alternative to actual weighing, the weight of bulk shipments may be computed, provided that the specific gravity of the material is known and the volume actually picked up is determined. For example, 2,000 gallons of liquid with a specific gravity of 1.4 = calculated weight of 23,344 pounds. ($2,000 \times 1.4 \times 8.337$, where one gallon of water weighs 8.337 pounds). Specific gravity will be obtained from a waste profile sheet.

(2) For either "actual weight" method, the vehicle will be weighed both before and after loading. For bulk shipments, where Government scales are not available or operable, the use of commercial scales is authorized. The contractor will arrange for and incur all expenses of weighing property at the nearest certified public scale.

b. Non-bulk Items

(1) For non-bulk items, the contractor shall provide portable scales for outweighing of property. Portable scales must have a minimum capacity of 1,500 pounds. For the purpose of this contract, scales permanently affixed or built into a vehicle are considered portable scales.

(2) Prior to the use of portable scales at each pickup site, the contractor must demonstrate reasonable weight accuracy to the Government representative. Only materials to be removed by the contractor will be weighed.

Pallets, boxes, strapping, etc., which are not integral parts of the packaging and are not being removed by the contractor will not be included in the weight.

(3) Government scales may be used, in lieu of scales provided by the contractor, only where they are available, operable, and authorized by the Government representative. The contractor shall be responsible for determining the availability of Government scales. The Government makes no guarantee that where Government scales are available, they are operable. At the Government's option, the use of Government scales will be allowed at the following sites:

SITE	EQUIPMENT AVAILABLE
All PWC locations	Platform Scales (5,000 lb)
NAS North Island, Pt Loma, NS San Diego	Platform Scales
Naval Amphibious Base	Platform Scales
NADEP PS-69, NAS North Island	Pallet Scales (2,500 lb)
NADEP, NAS North Island	Truck Scales
NAF, El Centro	Platform Scales, portable (2,500 lb)
DRMO, Imperial Beach	Electronic Pallet Scale, Harbor Drive Scrapyard Truck Scales, NOLF Backlot Truck Scale

(4) The use of commercial scales is not authorized for non-bulk items.

C.35 BULK LIQUID DISPOSAL

a. When bulk liquid disposal is ordered, it may be necessary for the contractor to pump material from tanks. The contractor shall furnish a collection vehicle equipped with pumps, hoses and a metering device. Pumps and hoses shall have the capacity to safely handle the types of waste to be collected, and be able to remove all liquids and sludge from tanks that can be removed without agitation or introduction of other materials to the tank. A tanker truck with a high capacity pump may be required. Sludge or solids that must be removed by other measures are not included. The contractor shall have fittings necessary to prevent accidental spills. Tank pumping may be ordered from any location in or around the pick up points in the contract. When bulk liquid disposal is ordered, the contractor shall coordinate with the COR to determine specific equipment requirements based on location of tank(s) to be pumped. The actual weight of the material picked up must be identified on the manifest.

b. Bulk liquid disposal may be ordered from any location in or around pickup points, in addition to the known sites identified below:

SITE	BLDG. NUMBER	TANK SIZE	CONTENTS
NADEP N.I.	472	3,200 gl above ground	Corrosive
NADEP N.I.	472	3,200 gl above ground	Toxics

C.36 SMALL CONTAINERS AND CONTENTS – CLINs 9101, 9101PP, 9101RR, 9201, 9201PP, 9301, 9401, 9501, 9701, 9751, 9801, and 9901

a. Services for the removal, transportation, storage, and disposal of small container(s) of RCRA/State regulated hazardous or nonhazardous property will be ordered using CLINs with a “1” in the fourth position, e.g., 9101, 9401. Unless specifically excluded below, small containers are any receptacle containing hazardous or nonhazardous property that has a capacity of less than five (5) gallons.

b. Small containers are not:

(1) Individual sealed articles that are formed to a specific shape or design during manufacture that have an end-use or function dependent in whole or in part upon the shape or design during use. (Examples of such items include, but are not limited to, fuel filters, oil filters, gas mask canisters, chemical defense equipment kits, and factory sealed containers that contain a small container (e.g., epoxy paint).

(2) RCRA empty containers of any size (which may or may not be crushed to reduce their volume). Examples of such items are empty oil cans, paint cans, etc.

c. In those instances where containers of hazardous property are placed into a larger outer container and the interior packaging is either all small containers as defined above, or a mix of different sizes, some being small containers as defined above, then the entire item (interior packaging and its outer container) shall be assigned to the appropriate small container CLIN.

d. The contractor shall accept the Government's CLIN assignment as a nonsmall container item unless the contractor demonstrates to the COR prior to removal from the Government facility that the item(s) does meet the definition of a small container.

e. If the contractor discovers a small container(s) packaged with other items not classified as small containers, the Government reserves the right to:

(1) Assign all the property, including the larger outer container, under the appropriate small container CLIN; or,

(2) Remove the small containers of hazardous property from the larger outer container, delete the small container items' weight from the task order, and reduce the containerized CLIN weight appropriately; or,

(3) Remove the small containers of hazardous property from the larger outer container; CLIN the small container items separately as small containers on the same task order, and reduce the containerized CLIN weight appropriately.

f. If the contractor elects to package EPA/DoT compatible items in the same container in order to facilitate recycling/disposal, then the contractor must provide an all-inclusive packing list showing each item and its respective quantity. This list shall be placed outside the outermost container. A copy of the packing list must be attached to the manifest. Contractor furnished overpack containers and packing materials will not be included in the total weight calculations for payment purposes.

C.37 ACCEPTANCE OF DISPOSAL SERVICES INVOLVING FUEL BLENDING (2 / 26 / 02)

a. DRMS acceptance of disposal services involving fuels blending are designed to encourage fuels blending as described at 40 CFR 266 and 279. It does not apply to blending for destructive incineration. Component fuels of the final blended product must adhere to regulatory guidance contained in 40 CFR Parts 266, subpart H, and 279, subpart G.

b. The fuel blending facility must provide a certification (on an annual basis) to the CO, via the prime contractor, signed by a responsible official of the facility, which:

(1) Specifies maximum processing time that property would remain in the fuel blending tank farm is **sixty** (60) days or less and guarantee that the fuel blended product will not remain in storage longer than the certified processing time.

(2) Identifies by name, address and EPA ID number all facilities which may receive the fuel blended products for energy recovery, per 40 CFR 266, subpart H and 40 CFR 279, subpart G.

(3) Identifies by name, address and EPA ID number all facilities which may receive the incidental solids, still bottoms, and/or sludge remaining after fuels blending which require destructive incineration per 40 CFR 264 and 265 subpart O.

c. DRMS prime contractors must obtain DRMS approval prior to the use of any incinerator that receives material in paragraphs C.37 (b) (2) and (3) above. Facilities proposed in C.37 (b) (2) and (3) which are not on the Qualified Facilities List must be requested in accordance with clause H.6. In addition, these facilities must meet the criteria outlined at clause H.5. Use of such facilities without prior DRMS approval will result in the rejection of the blender's certification and reversion to the standard tracking system, consisting of a manifest to the fuel blending facility and a manifest from the fuel blending facility to an incinerator.

d. DRMS will certify acceptance of disposal services only after acceptance of the blender's certification and manifested receipt by the fuels blending facility.

e. Any inconsistency between this provision and clause C.13 shall be resolved by giving precedence to this provision.

*NOTE: If the facility appears on the "Qualified Facilities" list on our web site (http://www.drms.dla.mil/newenv/html/hw_disposal.html), and C.37 is referenced in the "Plan" column for the facility, then the contractor need not comply with this paragraph. Upon Contracting Officer approval, the plan(s) will remain valid for the life of the contract, providing the facilities remain on the DRMS Qualified Listing. If the information continues to meet the requirements, the block will remain checked. If updates are not received, the check will be removed from the web and the prime contractor will subsequently not be paid unless a full audit trail is submitted or a new plan is approved.

C.39 ACCEPTANCE OF DISPOSAL SERVICES INVOLVING ANTIFREEZE RECYCLING (9/30/02)

a. DRMS acceptance of disposal services involving Antifreeze is designed to encourage recycling through the use of a plan that provides information on the final destination facility that actually recycles the antifreeze in addition to the storage/consolidation firms.

b. The storage/consolidation facility must provide a certification (on an annual basis) to the CO, via the Prime contractor, signed by a responsible official of the facility, which:*

(1) Specifies maximum processing time that property would remain in the storage/consolidation facility is sixty (60) days or less and guarantees that the product will not remain in storage longer than the certified processing time. If time exceeds this value, the firm will provide detailed rationale to DRMS.

(2) Identifies by name, address and EPA ID number all facilities which may receive the product for distillation/recycling purposes. These firms must be on the DRMS web listing.

(3) Identifies by name, address and EPA ID number all facilities which may receive the incidental solids, still bottoms, and/or sludge remaining after distillation/recycling treatments which require disposal in a RCRA TSDF.

c. DRMS prime contractors must obtain DRMS approval prior to the use of any facility that receives material in paragraphs C.39 above. Facilities proposed in C.39, which are not on the Qualified Facilities List, must be requested in accordance with clause H.6. In addition, these facilities must meet the criteria outlined at clause H.5. Use of such facilities without prior DRMS approval will result in the rejection of the firm's certification and reversion to the standard tracking system, consisting of a manifest to the storage/consolidation facility and a manifest from them to the recycling facility.

d. DRMS will certify acceptance of recycling services only after acceptance of the firm's certification and manifested receipt to the storage/consolidation TSDF.

e. Any inconsistency between this provision and clause C.13 shall be resolved by giving precedence to this provision.

*NOTE: If the facility appears on the "Qualified Facilities" list on our web site (http://www.drms.dla.mil/newenv/html/hw_disposal.html), and C.39 is referenced in the "Plan" column for the facility, then the contractor need not comply with this paragraph. Upon Contracting Officer approval, the plan(s) will remain valid for the life of the contract, providing the facilities remain on the DRMS Qualified Listing. If the information continues to meet the requirements, the block will remain checked. If updates are not received, the check will be removed from the web and the prime contractor will subsequently not be paid unless a full audit trail is submitted or a new plan is approved.

C.41 REPORTS (3/27/02)

DRMS Form 1683. Manifest Tracking Log (DRMS Form 1683). The contractor shall prepare the Manifest Tracking Log. This log is to be submitted prior to the invoices in accordance with G.11. Any differences between the contract inventory and what was actually picked up or disposed of must be thoroughly described and documented. Use attachments to the manifest tracking log if necessary.

C.43 DISPOSAL SURCHARGE FOR HIGH-LEVEL MERCURY – CLIN 6500MM (12/9/02)

CLIN 6500MM is a surcharge for hazardous wastes that exhibit the characteristic of toxicity for mercury (greater than 0.2 mg/L mercury after TCLP) and greater than, or equal to 260 mg/kg. This CLIN will be ordered in association with a disposal CLIN when the Government orders disposal of waste contaminated with high-level mercury. The unit of issue for CLIN 6500MM is pounds. The Government will order an equal number of pounds of 6500MM and of the disposal CLIN. For example, for disposal of 50 pounds of CLIN 9102 contaminated with a high level of mercury, 50 pounds of CLIN 6500MM will also be ordered. CLIN 6500MM does not apply if the high-level mercury waste is land disposed or treated prior to land disposal. CLIN 6500MM does not apply to disposal CLINs suffixed with an "M" in the fifth or sixth position.

C.44 EMPTY CONTAINERS (7/7/00)

Prior to reuse or sale of empty containers, the contractor shall comply with the empty container requirements of RCRA, the empty packaging and other shipping requirements of DoT, and obliterate all markings and labels. The contractor shall be exempt from the requirement to obliterate markings and labels only if the containers are crushed and sent to a scrap operation, crushed and sent to a landfill, or the containers are physically disposed of concurrently with their contents (i.e., incineration/landfill).

C.45 BULKING

a. Bulking shall be defined as the act of pumping from an otherwise removable container(s) into a tank truck. Containerized waste may be pumped into a tank truck (bulking) only at the following locations:

The NAS North Island consolidation points are restricted to certain areas within the HW storage facilities.

**NADEP, NAS North Island (except those areas controlled by PWC-SD)
NAF El Centro (except those areas controlled by PWC-SD)
PWC Facilities**

b. Bulking will be allowed only if the contractor has a spill contingency plan and performs operations in a safe manner. The Government retains the right to stop operations if environmental or safety concerns arise.

C.46 TANK / WASH RACK CLEANING – CLINs 6350, 6351, 6353, 6355, 6356, 6360, 6361 (Aug 02)

a. CLINs 6350/51/53/55 & 6356: When any of these CLINs are ordered, the contractor shall clean tanks, totes, oil/water separators, wash racks, etc., until no visible residue remains. Stains are not considered residue. The above listed CLINs do not include tank pumping or disposal of sludge/solids removed during the cleaning process. If required, tank and wash rack pumping will be ordered under the appropriate CLIN for the pumpable waste contained in the tank or wash rack in accordance with C.35. Disposal of unpumpable sludge/solids removed as part of the cleaning process will be ordered via the appropriate containerized/bulk disposal CLIN based on the known contents in the tank. This CLIN will appear on the task order issued for tank/wash rack cleaning. In all cases, the Government will ensure the pumpable waste in the tanks/wash rack is removed prior to tank cleaning. The contractor is responsible for providing all cleaning equipment, containers, and wash aids.

b. The Government will not provide containers for the sludge/solids removed. The contractor shall also provide access permit and all safety equipment including breathing apparatus, if required. The contractor is required to provide proper shipping papers and disposal certificates identifying the quantity of all waste disposed resulting from tank/wash rack cleaning in accordance with G.11. All work shall be completed within **fifteen (15) calendar days** of issuance of a written task order (See clause F.3).

c. When multiple tanks/wash racks are co-located in the same building, tank farm, wash facility, etc., only one (1) CLIN each shall be used with a limit of 3 tanks/wash rack per CLIN. This is specific to certain mobilization and confined space entry CLINs (6350, 6351, 6353 and 6355).

d. If the contractor elects to introduce liquids or other materials to tanks/wash racks to facilitate the removal of sludge/solids, the contractor shall monitor through metering, weighing, or any other approved measuring technique, the amount of liquids or other materials introduced into the tank/wash rack. The monitoring method used must be approved by the COR prior to commencing work. The weight of the liquids or other materials introduced to the tank/wash rack will be subtracted from the total weight of the wastes removed from the tank/wash rack. The difference between the liquids or other materials introduced into the tank/wash rack and what is removed from the tank/wash rack (the resulting sludge/solids) will be disposed of under the appropriate disposal CLIN, as stated above. All weighing will occur prior to the contractor removing the waste from the Government premises. The Government will modify the disposal CLIN weight listed on the task order to reflect the exact poundage of

sludge/solids removed. The contractor will be paid only for the sludge/solids removed, not the liquids or other materials introduced to aid cleaning. The contractor is responsible for proper disposal of the liquids or other materials used during the cleaning process at no additional cost to the Government.

e. Tank/wash rack cleaning may be ordered from any location in or around pickup points in the solicitation in addition to the **known sites listed in C.35**.

f. CLINs 6360 and 6361 shall be ordered by the hour for contractor personnel to perform the job requirement ordered with CLINs 6350–6356. The Government shall use their 'best estimate' when ordering CLIN 6360 and 6361.

C.50 PROVIDING STORAGE CONTAINERS AND RENTAL CHARGES –
CLINs 6372, 6372AD, 6375, 6375AA, 6375BB, and 6376DC (3/27/01)

a. CLINs 6372, 6372AD, 6375, 6375AA, and 6375BB: These CLINs will be ordered on a written task order to account for the rental period that a rolloff is left at a Government location. The Government may choose to order the above rental CLINs before or after Contractor placement or removal of the rolloff storage container(s). Rental charges may be accrued on a daily or yearly basis depending on the CLIN selected by the Government. Annual rental CLINs (6375AA and 6375BB) are for 365 days and may be ordered by the Government, and funded up front, in situations where rolloff storage containers are needed on-site on a continual basis. The bin rental period begins on the day of the bin drop and ends on the day of the bin pickup. For example, when bin A is full and ready for pickup the new empty bin B will be delivered at the same time as the full bin A pickup. Rent will end for bin A and begin for bin B at the same time.

b. CLIN 6376DC: Will be ordered for each rolloff placement or drop. This CLIN is exempt from minimum TO charges. When this CLIN is ordered on a written task order, the contractor is required to provide appropriately sized, plastic-lined rolloff storage containers on a daily charge from date of initial placement. The rolloff containers will have watertight covers, plastic liners, side-hinge back doors (for the 40 cy bins), and be lockable. **Bulk waste ordered on the same task order with rolloff storage container placement (CLIN 6376DC) shall be removed from Government facilities within five (5) calendar days after issuance of each written task order.

c. Rolloff storage containers may be ordered for any location in or around the pick up points identified in the contract. Rolloff(s) placement is required within **five (5) calendar days** after issuance of a written task order citing any of the above listed CLINs. Disposal of waste in the rolloff will be ordered using the appropriate "bulk" CLIN and also will be required within **five (5) calendar days**.

d. The contractor is required to weigh empty storage containers prior to use by the Government and provide the COR a copy of a certified Weight Certificate which shows the weight of each empty storage container at the time of

placement. The contractor is required to weigh each storage container upon pickup (and provide a copy of the weight certificate for each container showing the weight of the storage container and its contents) to the COR. The Government will only pay disposal fees for the weight of the contents.

e. The CLINs listed above will only be ordered by the Government for the convenience of the Government.

C.51 CHARGES FOR EXPEDITES – CLINs 6333 (9000 CLINs), 6335 (9000 CLINs), 6343 (6000 CLINs), and 6345 (6000 CLINs) (6/12/02)

a. When the above **removal** CLINs (6333 or 6335) are ordered, waste must be removed within the specified calendar day timeframe. CLIN 6333 is ordered for a (5) day removal. CLIN 6335 is ordered for a (1) day removal. Expedited removal CLINs may be ordered in association with any disposal CLIN(s) at any pick-up point(s) on the contract. This is an exception to the standard removal timeframe as specified in F.3. Minimum task order charges will not apply to a task order containing an expedited removal CLIN. When expedited removal is required, CLINs 6333/35 will be ordered based on the amount of waste to be removed. One (1) each will be ordered for containerized (non-bulk) waste up to 15,000 pounds in total weight and a maximum of up to eight (8) different task order lines. For bulk removals, one (1) each CLIN 6333/35 is limited to one (1) task order line not to exceed 40,000 pounds in total weight.

b. When the above **performance** CLINs (6343 or 6345) are ordered, performance must be accomplished within the specified calendar day timeframe. CLIN 6343 is ordered for a (5) day performance. CLIN 6345 is ordered for a (1) day performance. Expedited performance CLINs may be ordered in association with any special requirements CLIN(s) (6300–6599 series) at any pick-up point(s) on the contract. This is an exception to the standard performance timeframe as specified in Clause F.3. Minimum task order charges will not apply to a task order containing an expedited performance CLIN. When expedited performance is required, CLIN 6343/45 will be ordered based on the amount of service to be performed. One (1) each of CLIN 6343/45 will be ordered for up to five (5) Special Requirements task order lines. Ordering of an expedited performance CLIN is further limited to one (1) each, expedited performance CLIN, per pick-up location including the surrounding area (i.e., all pick up sites on an installation).

C.52 LABPACKING SERVICES – CLINs 6321, 6322, 6323

a. The contractor shall provide all labor, equipment, supplies (including labpack containers), and tools necessary to labpack waste. Labpacking service is on this contract to provide a packaging service to the generator in order to facilitate the turn in of property to the DRMO. These CLINs do not include disposal. This clause does not relieve the Contractor of repacking requirements in C.19 when the Government does not require labpacking services.

b. The Government will order the appropriate labpack CLIN(s) dependent on the anticipated labpack container size required. The contractor shall accept the Government's container size unless the contractor demonstrates to the COR, prior to commencing the labpacking service, that a different size labpack container(s) is required. When this service is ordered, the Government will provide a list of property to be labpacked with the task order. The list will include chemical name, weight and volume of each item and anticipated disposal CLIN (for information purposes only). The contractor shall:

(1) Prepare labpacks for chemical waste. This service consists of packing compatible chemicals into suitable labpack containers, preparing a comprehensive drum inventory, marking and labeling each labpack in accordance with local, state, and Federal regulations. The Government will order this service on a task order using the labpack service CLIN(s) listed above.

(2) The contractor will labpack the waste according to chemical compatibility and in compliance with 49 CFR, specifically 49 CFR 173.12. The contractor will prepare the aforementioned drum inventory. The inventory will consist of a list of each container placed in the labpack. The list must specify: 1) description of the contents of each container by chemical or common name of the waste; 2) hazardous constituents causing the item to be a hazardous waste; 3) EPA and state hazardous waste codes assigned; 4) container size; 5) weight of each container and its contents (the contractor will weigh all items, actual weight will be used on the labpack inventory.); and 6) disposal CLIN (provided by COR). Multiple containers of the same waste may be listed as a single line on the inventory list provided; the total number of containers is recorded in association with the container sizes and the total weight of the containers and contents is listed instead of individual container weights. A unique identification number will be assigned to each completed labpack and this number will be annotated on the inventory list. One copy of the inventory list will be attached to the labpack and one copy will be provided to the COR when packaging is complete.

(3) The contractor will place appropriate markings and DoT labels on each container, along with an inventory list.

c. The contractor will be provided a work site, storage area for supplies, and a staging area near the chemical storage facility. The Government will not furnish any Government owned equipment. Labpacking services may be ordered at any pickup point on this contract. When Labpacking services are ordered, all work must be completed within fifteen (15) calendar days of written task order issuance, unless an expedited performance CLIN is ordered.

d. The Government will issue a task order for the disposal of labpacks after the labpacking service is completed. Task orders containing the disposal of labpacks will be prepared based on the total weight of each separate CLIN/item packaged in each labpack. The total weight of each separate CLIN/item in the labpack will be determined by the sum of the weights (rounded to the nearest pound) of the individual items assigned that CLIN on the labpack inventory. In order to identify the labpack associated with the CLIN being ordered, the unique number assigned to the labpack will be provided in the item description on the task order. For purposes of labpack removal and contractor invoicing, the items packaged in labpacks by the Contractor under the labpack CLINs are excluded from the small container definition in C.36.

C.53 RECYCLING OF FUELS BLENDABLE MATERIALS (6/12/02) CLINs 9101RR, 9102CP, 9102RR, 9106RR, and 9802RR

a. The contractor is required to recycle/fuels blend/burn, as defined by 40 CFR Parts 264, 265, and 266, and CCR Sec 66266.1 &.2(b), Recyclable Hazardous Wastes, all CLIN(s) listed above. The contractor will only be required to fuels blend/burn waste under the CLIN(s) listed above, if it has a BTU level of 5,000 per pound or greater; and contains no more than fifteen (15) percent water by volume; and no more than five (5) percent halogens by volume. Some fuels blendable waste may also be anticipated under the appropriate disposal CLIN.

b. Throughout the life of the contract, the contractor must maintain a file of applicable export permits. This file shall include current notification(s) of intent and EPA Acknowledgment(s) of Consent and must be made available to the CO upon request.

c. If a waste designated for fuels blending/burning does not meet the above parameters for fuels blend/burn and if the waste cannot be recycled per 40 CFR Parts 264, 265, and 266, or CCR Sec 66266, the contractor must obtain certification from the disposal facility of its rejection, as well as the rationale for the rejection. If waste is rejected, the contractor must contact the CO and obtain disposition instructions, as well as provide two (2) copies of the rejection certification, along with any analysis, which supports the rejection to the CO, within fourteen (14) calendar days after the occurrence.

C.54 RECLAMATION OF MERCURY BATTERIES CLIN 9404MB and 9804AB (6/12/02)

The contractor is required to reclaim mercury from batteries ordered under the CLIN(s) listed above. Reclamation must be accomplished via retorting or roasting in a thermal-processing unit capable of volatilizing mercury and subsequently condensing the volatilized mercury for recovery (as defined in 40 CFR).

C.54a. RECYCLING / RECLAMATION OF BATTERIES

The contractor is required to recycle/reclaim the RCRA regulated components of all batteries removed under CLIN(s) suffixed AB (alkaline), LA (lead acid), NC (nickel cadmium), LL (lithium), MB (mercury), MG (magnesium). Recycling/reclamation shall meet all requirements of 40 CFR and CCR Sec 66266.1–2, Recyclable Hazardous Wastes. If the Contractor disposes of a recyclable hazardous waste listed in CCR Sec 66266.2, an amount of five times the disposal fee that would otherwise apply to the disposal of that hazardous waste will be deducted from an open task order. (See C.68 and C.73)

C.55 RECYCLING OF SOLVENTS, USED OIL, AND ANTIFREEZE CLINs 9502PL, 9502RH, 9502RR, 9802PL, and 9802AF (6/12/02)

The contractor is required to recycle, by a means other than fuels blending/burning, the CLIN(s) listed above. These are recyclable hazardous

waste per CCR Sec 66266.1 &.2(b), Recyclable Hazardous Wastes. The contractor will be required to dispose of all resulting solid wastes in accordance with all local, state, and Federal regulations. If the Contractor disposes of a recyclable hazardous waste listed in CCR Sec 66266.2, an amount of five times the disposal fee that would otherwise apply to the disposal of that hazardous waste will be deducted from an open task order.

C.56 RECYCLING OF LEAD-ACID BATTERIES CLINs 9204LA, 9404LA
(6/12/02)

The contractor is required to recycle lead from batteries removed under the CLIN(s) listed above. The batteries may be filled with electrolyte. Such recycling should meet all requirements of 40 CFR 261.6(a)(2)(iv) and CCR Sec 66266.1–2. If the Contractor disposes of a recyclable hazardous waste listed in CCR Sec 66266.2, an amount of five times the disposal fee that would otherwise apply to the disposal of that hazardous waste will be deducted from an open task order.

C.57 RECLAMATION OF NICKEL–CADMIUM BATTERIES CLINs 9204NC, 9404NC (6/12/02)

The contractor is required to reclaim nickel and cadmium from batteries removed under the CLIN(s) listed above. The batteries may be filled with electrolyte. The Government will order recycling of nickel cadmium batteries under the appropriate CLIN(s) listed above.

C.59 RECYCLING OF LATEX PAINT CLIN 9902LP (6/12/02)

The contractor is required to recycle latex paint under the CLIN(s) listed above. The waste will consist of partially used cans of latex paint. The paint will not be hardened. The recycling facility must blend the paint into a usable product. Some latex paint may also be anticipated under the appropriate disposal CLIN.

C.60 RECYCLING OF OIL FILTERS CLINs 9804FA, 9904FB (6/12/02)

The contractor is required to recycle oil filters under the CLIN(s) listed above. Oil filters removed under CLIN 9804FA will be drained of oil, but some liquid will remain. Oil filters removed under CLIN 9904FB will be drained of oil and dry. The contractor shall recycle at least 90% (by weight) of the filter. The contractor is required to recycle all of the drained oil. Some oil filters may also be anticipated under the appropriate disposal CLIN.

C.62 RECYCLING OF ALKALINE BATTERIES CLINs 9804AB (6/12/02)

The contractor is required to recycle zinc from batteries removed under the CLIN(s) listed above. The batteries may be filled with electrolyte. Some alkaline batteries may also be anticipated under the appropriate disposal CLIN.

C.63 RECYCLING OF MAGNESIUM BATTERIES CLIN 9404MG

(6/12/02)

The contractor is required to recycle metal casings, as well as the magnesium from inside of the battery. Chromium, when present, shall be treated in accordance with 40 CFR 268 treatment standards. The batteries may be filled with electrolyte. Some magnesium batteries may also be anticipated under the appropriate disposal CLIN.

C.64 RECYCLING OF FIXER DEVELOPER SOLUTION CLIN 9402FD

(6/12/02)

The contractor is required to recycle silver from fixer developer solution removed under the CLIN listed above. Solution contains an average of 100 ppm silver; however, this average may fluctuate. The Government does not guarantee the average will remain constant over the life of the contract. The contractor is required to recycle silver from the solution until silver content in the solution falls below RCRA regulatory levels of 5.0 parts per million. Some fixer developer solution may also be anticipated under the appropriate disposal CLIN.

C.66 UNIVERSAL WASTE - CLINs 9800UB, 9800UL, 9800UM and 9800UR

The Government may manage the CLINs listed above as Universal Waste under the alternate set of management standards set forth in 40 CFR Part 273 and state and local equivalents. Off-site shipments of Universal Waste must comply with 40 CFR 273.18 and 273.38 and state and local equivalents.

C.67 RECYCLING OF LITHIUM BATTERIES - CLIN 9304LL (6/12/02)

The contractor is required to recycle lithium salts from batteries removed under the CLIN(s) listed above. Some lithium batteries may also be anticipated under the appropriate disposal CLIN.

C.68 ACCEPTANCE OF DISPOSAL SERVICES INVOLVING RECYCLING/RECLAMATION OF BATTERIES (2/26/02)

a. The contractor is required to recycle/reclaim all batteries identified in applicable sections C.54, C.56, C.57, C.62 C.63 and C.67. In addition, batteries ordered under the appropriate disposal CLIN(s) might be recycled.

b. The contractor shall identify any facility that receives batteries for recycling/reclamation. The recycler must provide a certification to the CO for each DRMS disposal contract affected; signed by a responsible official of the facility which:

(1) Describes the procedure for the disposition/sale of the RCRA recovered products (e.g., lead, nickel, cadmium, zinc, and lithium).

(2) Describes the treatment/disposition methods for liquids in wet-filled batteries.

(3) Identifies by name, address and EPA ID number, and all facilities, which may receive the various components.

(4) Guarantees the recovered products will not be shipped outside the United States, without prior authorization of the CO. If shipped outside the United States, list all countries that may receive the recovered product. If the components are shipped outside the United States, that a copy of the notification of intent to export and the EPA Acknowledgment of Consent will be provided with the certificate of recycling.

c. DRMS prime contractors must obtain DRMS approval prior to the use of any recycler that receives batteries described above. In addition, these facilities must meet the criteria outlined at H.5. Use of such facilities must be on a contract-by-contract basis. Use of such facilities without prior DRMS approval will result in reversion to the standard tracking system, consisting of a manifest or bill of lading to the recycling facility, a manifest from the recycling facility to the facility(ies) receiving various components and Certificate(s) of Destruction issued by the facility(ies).

d. DRMS will accept a signed manifest/shipping paper receipt as certification of disposal by recycling.

e. Any inconsistency between this provision and C.13 shall be resolved by giving precedence to this provision.

***NOTE:** If the facility appears on the “Qualified Facilities” list on our web site (http://www.drms.dla.mil/newenv/html/hw_disposal.html), and C.68 is referenced in the “Plan” column for the facility, then the contractor need not comply with this paragraph. Upon Contracting Officer approval, the plan(s) will remain valid for the life of the contract, providing the facilities remain on the DRMS Qualified Listing. If the information continues to meet the requirements, the block will remain checked. If updates are not received, the check will be removed from the web and the prime contractor will subsequently not be paid unless a full audit trail is submitted or a new plan is approved.

C.69 DEMILITARIZATION CERTIFICATES OF DISPOSAL

(8 / 2 / 02)

Property requiring Demilitarization by the Government will be so listed on the DD Form 1155 Order for Supplies or Services by the DRMO. When property requiring DEMIL is ordered the Contractor is required to dispose of this property either by burial or incineration per DoD requirements. The audit trail showing DEMIL was accomplished shall be the hazardous waste manifest, a completed service contract delivery order (DD form 1155), and a certificate of disposal. DEMIL property includes, but is not limited to, Chemical Defense Equipment (CDE) Kits.

**C.71 CLIN ITEMS DELIVERED TO THE TSDFs BY THE GOVERNMENT -
CLINs 9407AA, 9807AA**

a. The Government shall provide transportation to approved TSDFs in California (CA) and Nevada (NV) only when ordering CLINs 9407AA or 9807AA. The Contractor shall be responsible for all pre-shipment tasks and disposal requirements described in the contract. The Government assumes liability for all Government-caused spills.

b. The Contractor must coordinate the transportation schedule through the COR/COTR. The Contractor shall notify the COR/COTR to arrange for the Government transportation at least five (5) **business** days prior to the transportation. The Contractor shall be notified by task order of which CLINs will be transported by the Government.

c. The Government shall transport to the approved TSDFs and only to the Prime Contractor-chosen TSDF. The Government assumes responsibility for all Government-caused delays.

d. The Contractor shall be responsible for completing waste profiles required for disposal. The Government may utilize Government-owned ten (10) and (20) cubic yard bulk containers for the transportation of wastes to the TSDFs.

e. Given that the CLINs in this clause require use of TSDFs in CA, NV, AZ, and UT only, the Contractor must price these CLINs using TSDFs in CA or NV only which are on the DRMS Qualified Facilities List found on the DRMS world-wide web. IT IS NOT THE DECISION OF THE CONTRACTOR WHETHER OR NOT THE CLINS LISTED ABOVE ARE UTILIZED. ONCE THESE CLINS HAVE BEEN SELECTED BY THE GOVERNMENT, THEN THE CONTRACTOR CAN SELECT THE TSDF IN CA OR NV TO WHICH THE GOVERNMENT SHALL TRANSPORT THE WASTES (if more than one is available).

C.73 MANDATORY RECYCLING (12/15/00)

a. The following coverage applies when the contractor alleges that a waste designated for recycling cannot be recycled.

(1) If a waste designated for recycling by the generator does not meet the facilities required recycling parameters, the contractor must notify the CO, in writing **at least five (5) business days**, before pickup, of the rationale and proof for waste rejection. This must include written input from at least three appropriate recycling facilities approved on the DRMS Qualified Facilities List, at least one of which is not owned by the contractor.

(2) The CO will notify the cognizant DRMO and/or generator personnel to resolve requests to change the assigned mandatory recycling CLIN to the appropriate disposal CLIN. The final decision to change a mandatory recycling CLIN to the applicable disposal CLIN is solely that of the Government's. If the DRMO and/or generator personnel agree with the CLIN change the applicable disposal CLIN will be assigned.

b. If the contractor fails to recycle without following the above procedure, in order to reflect the reduced value of the services performed, the Government reserves the right to either:

(1) Reduce the task order line item price in accordance with the Inspection of Services Clause, FAR 52.246-4. The Contractor is hereby notified that the line item price shall be reduced by five times the applicable disposal CLIN price or by five times the recycling line item price, whichever is a greater reduction; or

(2) Terminate the task order line item for default in accordance with the Default Clause, FAR 52.249-8, **which will impact the contractor's performance record.**

***If an expedite CLIN is used (6333 or 6335) the five (5) day business notification is waived.**

C.75 MOVEMENT OF BINS AFTER INITIAL DELIVERY – CLINs 6388, 6388AA

a. At the request of the Government, the Contractor will move previously placed storage containers from the original point of placement to any other location on the same installation under CLIN 6388.

b. The Government may require the Contractor to transport a Government-owned bin to a Contractor-selected commercial disposal facility in order to dispose of the bin contents (separately ordered for disposal using the appropriate bulk disposal CLIN). CLIN 6388AA will be ordered by the Government to compensate the Contractor for the return of the empty Government bin from the commercial disposal facility to the point of generation.

C.76 PIPELINE CLEANING FOR TANK SYSTEMS – CLIN 6355

CLIN 6355 requires the Contractor to clean pipes/lines, which are normally connected to tank systems that carry oily waste and have petroleum-contaminated scale that includes but is not limited to rust, calcium, carbonate, perlite, etc. It will usually be ordered in association with the tank cleaning services; however, there may be occasions when the pipes will be cleaned without ordering the cleaning of tank systems. This CLIN will be used in cases where normal flushing by water or rinsate does not clean the pipes. The Government will be responsible for flushing/rinsing of pipelines prior to ordering this CLIN. Pipe diameters will vary from 2–12 inches. Pipes/lines will vary in length. CLINs 6360/6361 shall be ordered for man-hours to perform this work, but performance will be within normal work hours for the installation involved. If all hours ordered by the delivery order are not used, a modification will be made to reduce the number of hours ordered to the number actually used. The Government will be responsible for providing access points on the pipelines. This involves disconnecting items from structures or other equipment or disassembling piping in order to allow adaptation to be made for special fittings, if necessary. The Contractor may put waste generated from pipe cleaning back into the tank where the pipes originated.

C.78 MANAGEMENT SERVICES – CLINs 6377, 6502, and 6502BB

a. The Contractor shall, within three (3) calendar days after issuance of a written task order, provide management services to process hazardous materials/waste from any generator serviced by this contract under CLIN 6502. These services are for preparing waste for turn-in to the DRMO and may include preparation of Hazardous Waste Profile Forms, DD form 1348-1/1A (to be furnished by the Government), overpacking, labeling, marking, on-site transportation, or properly storing containers on Government premises. Labeling shall include all Federal, state, local and base requirements and shall be in accordance with all EPA/DOT requirements, and shall include the proper disposal CLIN and disposal unit price per contract. For hazardous materials, the Contractor shall obtain Material Safety Data Sheets if available from the generator. When a task order is issued containing CLIN 6502, the Contractor, under direction of the facility supervisor, may be required to perform any or all of the following:

1) Prepare overpacks of compatible chemical characteristics and CLINs for turn-in to the DRMO. This consists of preparing a comprehensive drum inventory, a waste profile sheet for each complete overpack, marking and labeling each overpack in accordance with Federal, state, and local regulations. The Contractor shall prepare the drum inventory and list each item by weight, description, of content, and container size. Disposal of overpacks will be ordered

on a separate written task order after overpacking is completed. The Contractor shall furnish overpack containers when material being processed for turn-in is leaking and will be physically transported to another storage site/DRMO before the Contractor removes it for disposal. The Government shall order containers for overpacking using CLIN 6377 on a cost reimbursement basis.

2) Weigh all items. The Contractor may be required to furnish portable scales. Actual weight will be used on the drum inventory. The weight used for billing overpack removal will be calculated by weighing each chemical or compound contained in the overpack. All weights shall be marked on the outside containers.

3) Lab Packing may be accomplished under CLIN 6502 in conjunction with other Management Services (or separately under C.52). All steps in clause C.52 shall be followed when lab packing occurs.

4) Transportation on-site shall not use any tanker type trucks. On-site transportation and storage will be for movement from the generation site to proper storage at a 90-day site or Conforming Storage Facility only. It will be up to the Contractor to ascertain from the generator what type of equipment is needed to complete this job.

5) The Contractor shall provide all labor, equipment, and any other required materials needed to accomplish all tasks necessary to prepare materials/wastes for turn-in to the DRMO. The Contractor shall provide completed paperwork (profiles/1348-1/1A, MSDSs) to the designated generator representative upon completion of all tasks with this CLIN. The Government will not provide any Government furnished equipment.

b. The Contractor shall, within three (3) calendar days after issuance of a written task order, provide management services to provide labor to perform puncturing of aerosol cans from any generator serviced by this contract under CLIN 6502BB. When CLIN 6502BB is ordered the Contractor is required to perform puncturing of aerosol cans utilizing Government equipment. The Government shall provide all training necessary to perform this job. The Government uses various commercial manufacturer and model equipment to perform this puncturing process. The Contractor must be physically fit; have the normal use of both arms and legs; have good vision and hearing. The task may require working in PPE, with a respirator, frequent kneeling and stooping, and bending (this work cannot be accomplished in a sitting position). With the exception of lunch and periodic breaks, the contractor will be required to work in standing position continuously for the entire day (8 hours). The Contractor may need to lift and carry loads up to 75 pounds personally or by using materials handling equipment. Frequent handling of 55-gallon drums of hazardous material and waste and walking over varying terrain will be the norm. The

Contractor must be HAZWOPER trained and have the necessary physical examinations to work around hazardous waste.

c. The Government will not order any analysis under CLIN 6502 or 6502BB.

d. A minimum of four (4) hours of CLIN 6502 or 6502BB per contract personnel will be ordered when Management Services are required.

e. Task orders, which contain CLIN 6502 or 6502BB, are exempt from the minimum dollar limitation requirements in this contract. All sites on this contract may use this clause.

C.79 SUPPLIES REIMBURSEMENT – CLIN 6609ME

When CLIN 6609ME is ordered, the DD Form 1155 will contain an itemized list of all materials required by the Government. The Contractor will supply the generator at the Naval Air Facility El Centro with the supplies ordered. Containers are considered materials per FAR 16.601 and as such will be covered as a reimbursable item. Materials and material handling costs will be covered on a reimbursable basis after the Contractor has submitted invoices, with the total amount to be reimbursed, for each item supplied to the Government. The Contractor shall also supply an itemized listing of replacement containers left at each location in addition to the invoice. The listing shall include the number, type and size of each container. Unless the Government specifies otherwise, all containers supplied by the Contractor will be new (not reconditioned).

The Government anticipates that supplies under this clause may include, but not be limited to, any of the following:

Recycled pallets

Liners for triwall boxes

Drums (1A2, 1A1-55GL, 1A2-30GL, 1A1-30GL, 1A2-16GL steel, 1A1-16GL steel)

Overpack drums (steel)

Visqueen (20 x 100 roll)

Drum liners (55 GL/6ML)

Pail (5 GL white poly/lid) UN 1H2/Y1.5/30

EP3 CYB (cubic yard box)

C.80 BULK SOLIDS SLUDGE FILTER CAKE – CLIN 9537FC

When this CLIN is ordered the contractor shall dispose of this bulk solid waste. This is an industrial waste treatment sludge filter cake generated from treatment of metal finishing and paint stripping rinsates at Naval Air Station North Island.

C.81 DEMILITARIZATION OF SUBMARINE TILES – CLIN 9404ST

Special Hull Treatment (SHT) tiles, as required by the Government, require demilitarization and will be so listed on the DD Form 1155 Order for Supplies or Services by the DRMO. The contractor is required to dispose of this property by incineration per DoD requirements. The disposal manifest from an incinerator on the DRMS “Qualified Facilities List” will serve as the Demilitarization Certificate to certify DEMIL as accomplished.

D.0 SECTION D – PACKAGING AND MARKING

D.1 PACKAGING, MARKING AND LABELING DRMS 52.246-9R01 (JUN 1999)

PART 46 OF DRMS CLAUSES

F.0 SECTION F – DELIVERIES OR PERFORMANCE

F.1 STOP WORK ORDER FAR 52.242-15 (AUG 1989)

F.2 GOVERNMENT DELAY OF WORK FAR 52.242-17 (APR 1984)

F.3 PERIOD OF PERFORMANCE INCLUDING DISPOSAL AND REMOVAL CLAUSES DRMS 52.211-9R06 (JAN 2002)

(a) Task orders against this contract may be written for a period of 18 months from date of award, or April 13, 2006, whichever is later.

(b) All items shall be removed from the Government facilities within **fifteen (15) calendar** days after issuance of each written task order except as noted below.

(c) After issuance of a written task order, Special Requirements CLINs (6300-6599 series CLINs) will be performed within the timeframe specified in the associated C. Clauses.

(d) Bulk waste (9X07 CLINs) ordered on the same task order with rolloff storage container placement (CLIN 6376DC) shall be removed from Government facilities within **five (5) calendar** days after issuance of each written task order.

F.8 OPTION TO EXTEND THE TERM OF THE CONTRACT DRMS 52.217-9R01 (JAN 2000)

PART 17 OF DRMS CLAUSES

F.10 EXTENSION OF SERVICES DRMS 52.217-9R02 (JAN 2000)

The Government may extend the contract period under this clause and clause I.27 at the end of the base contract period or at the end of the 18 month option period.

G.10 REPORTING REQUIREMENTS DRMS 52.211-9R16 (JAN 2000)

PART 11 OF DRMS CLAUSES

G.11 DOCUMENTATION REQUIREMENTS, ACCEPTANCE, INVOICING AND TRACKING DRMS 52.232-9R01 (MAR 2004)

(a) Submission of Documentation to Facilitate Acceptance for Payment.

(1) The contractor shall submit one complete set of documents per task order to allow acceptance for payment, consisting of the following:

(i) One DRMS Form 1683-1 for each task order to include all line item numbers from the Task Order (in order) completed through Column 8, except items that undergo final disposal at their first Qualified TSDF must be submitted with complete tracking data (through Column 14 on the DRMS Form 1683-1).

(ii) All signed return shipping papers (manifests or Bills of Lading as appropriate) from Qualified TSDFs authorized to receive the items as per H.5, DRMS 52.244-9R01, Use of TSDFs and Transporters. Per C.3.1 and C.3.6 a copy of the Compressed Gas Cylinder (CGC) report shall be provided to the COR prior to invoicing. A copy of the CGC report is also to be submitted with the 1683-1.

(2) The above documentation shall be submitted to:

Defense Reutilization and Marketing Service

ATTN: DRMS-NPC
74 Washington Avenue, North
Battle Creek, MI 49017-3092

(b) Acceptance and Invoicing

(1) For purposes of payment only, all disposal/recycling actions are considered accomplished on the date the items are accepted by the initial, properly permitted, qualified TSDF. For 6000 series CLINs, the services are considered accepted on the date the DRMO inputs the pickup date into the DRMS Base Operations Support System (BOSS). Subsequently, the Government shall generate and electronically transmit a Disposal Manifest Report(s) (626) covering all items on the task order within 20 days of receipt of the contractor's original submittal. The 626 will be electronically transmitted to the contractor and directly to U.S. Bank for payment. Payment to the contractor will be made through Electronic Funds Transfer (EFT) within 24 to 72 hours of receipt by U.S. Bank. The contractor agrees to a mandatory fee for payments made through U.S. Bank. These fees are payable to U.S. Bank and will be deducted from the contractor's account when U.S. Bank transfers funds to the contractor's bank account. All fees are subject to the terms of the agreement signed with U.S. Bank. The Government will not reimburse the contractor for any fees assessed by U.S. Bank.

(2) Contractor tracking of the 626 submission for payment can be done through your boss access or through PowerTrack. For any discrepancies in payment, contact the contracting specialist or contracting officer at DRMS assigned to this contract.

(c) Post-Payment Tracking

(1) The contractor agrees to enter disposal information directly into the DRMS Base Operations Support System (BOSS) for all items on the order as the disposal information is received. Contractor access to BOSS may be obtained by the procedures outlined in clause H.1. Web based BOSS is currently available at the following URL: <https://vesta.dscr.dla.mil/forms90/f90servlet?config=bossprod>. Once the contractor has input disposal information into the Base Operating Support System (BOSS), notification to the responsible Contract Specialist must be made within 24 hours after order input is complete. Notification to the Contract Specialist can be made by e-mail. The contractor must indicate in the subject line of the email that disposal input into BOSS has been completed for specified PIIN (contract and task order number). The contractor must also notify the DRMS Tracking Department by email at the following address: Phase2Done@mail.drms.dla.mil.

(2) If a discrepancy occurs while inputting into the BOSS, the following steps need to be followed:

(i) If there is a problem with the pickup information input by the DRMO, the contractor needs to contact the Contract Specialist for resolution.

(ii) If a contractual, i.e., a recycling CLIN is not recycled, or a regulatory violation occurs, an email needs to be forwarded to the Contract Specialist with a copy to the DRMS Compliance Department, Phase1_2Problems@mail.drms.dla.mil. (Please note: there is an underscore between the 1 and 2).

(iii) A unique or unspecified problem occurs with input into BOSS. The contractor should email the DRMS Tracking Department with the specifics at Phase1_2Problems@mail.drms.dla.mil. (Please note: there is an underscore between the 1 and 2).

(3) Input of disposal information into BOSS by the disposal contractor will be within 20 calendar days after the waste has been disposed as outlined in clause F.3. By signature on this contract, the contractor certifies the disposal data input into BOSS is accurate, complete, and meets all requirements set in this contract.

(4) The contractor shall specify in the notification to the Contract Specialist, as indicated in paragraph (c)(1) of this clause, which, if any, of the line items disposed and input into BOSS are PCB items. The contractor must provide, to the generator and COR, copies of Certificates of Disposal signed by a responsible disposal facility official for all PCB items on a task order.

(5) The Government reserves the right to subsequently review/audit any and all information provided under this clause, this includes all information directly input into BOSS by the contractor. Upon being informed of any deficiencies resulting from the Government review/audit, the contractor shall respond with correcting documentation within 10 calendar days. As outlined in E.4, Places of Government Inspection, DRMS also reserves the right to conduct on site visits to insure compliance with this clause, clause H.1 and all other pertinent security regulations.

(6) No paperwork in conjunction with Phase II needs to be submitted to DRMS, WITH THE EXCEPTION OF PCB and COMPRESSED GAS CYLINDERS (CGC) REQUIREMENTS. FOR PCB's Certificates of Destruction are required to be submitted for PCB waste including cylinders. Per C.3(d) Certificates of Disposal or Recycling for all gases and empty cylinders are required to be submitted. See also C.3.3(c) and C.3.3(f)(1). However, the contractor is still required to maintain a complete audit trail for all waste streams. The contractor shall maintain hard copies of all disposal documentation for a

period of six years after FINAL PAYMENT ON THE CONTRACT. This documentation will be made available to the Government upon request.

(d) Remedies for Non-Compliance

(1) Failure to submit timely and complete documentation for acceptance of payment on a task order under paragraph (a) above will result in no payment of the entire task order. Payment may be approved upon resubmission of the correct documentation for all line items on the task order. The Government, at the discretion of the Contracting Officer, can utilize other remedies including those indicated below.

(2) Failure to input timely and complete disposal information into BOSS per paragraph (c) above, including resolution of any discrepancies, may be remedied by the Government using any and all contractual means available. This includes, but is not limited to:

- (i) E.1 Inspection of Services (FAR 52.246-4),
- (ii) I.57 Default (FAR 52.249-8),
- (iii) H.30 Indemnification (DRMS 52.211-9R13),
- (iv) I.80 Warranty of Services (FAR 52.246-20)
- (v) Past performance evaluations utilized in option exercise and future contract award decisions.

SECTION H

SECTION H – SPECIAL CONTRACT REQUIREMENTS

H.1 CONTRACTOR ACCESS TO DRMS BASE OPERATIONS SUPPORT SYSTEM (BOSS), DMF ONLY DRMS 52.204-9R03 (JUL 2004) PART 4 OF DRMS CLAUSES

1. In order to process the tracking and payments of completed delivery orders more quickly, a contractor must designate personnel within their organization be assigned a DRMS login to perform input of data into the Base Operations Support System (BOSS). DoD 5200.2-R, DoD Personnel Security Program, requires DoD military and civilian personnel, as well as DoD consultant and contractor personnel, who perform work on sensitive automated information systems (AISs) be assigned to positions that are designated at one of three sensitivity levels (ADP-I, ADP-II, ADP-III). These designations equate to Critical Sensitive, Non-critical Sensitive, and Non-sensitive. DLA has implemented the DoD policy in paragraph 3-101 of DLAR 5200.11, DLA Personnel Security Program.

2. The contractor shall assure that individuals assigned to perform input of data into the Base Operations Support System (BOSS), determined to be an ADP-III position, complete and provide the appropriate information for the investigative requirement. Personnel occupying ADP-III positions require a National Agency Check (NAC), but may be assigned a login authority prior to completion of the investigation. The procedure for requesting a NAC is to complete the Electronic Personnel Security Questionnaire (EPSQ), which is submitted electronically to the Defense Security Service (DSS). The EPSQ may be downloaded from the Defense Security Service Web Site at <http://www.dss.mil>. Go to the home page. You will see a series of menu items on the left side. Click on EPSQ.

a. Scroll down until you see the section downloading EPSQ Version 2.2. Click on the word "Download" in the paragraph. Scroll down to the icon of a feather quill and paper. Click on it. Click on the button that states, "Press to acknowledge the above statement and continue."

b. Click on the download for "Windows 95, 98, NT or 2000 users." This screen gives you four choices. Click on Number 2, "Download a "new" installation of EPSQ."

c. You now have two choices. Click on the "Subject Edition." Follow the instructions and install the program. The program will establish an icon on your desktop screen.

d. Click on the EPSQ icon. Click on "CREATE" on the toolbar. A menu will come up. Click on "APPLICATION FOR A POSITION OF PUBLIC

TRUST (SF 85P).” Then click on NATIONAL AGENCY CHECK (NAC). Fill in the requested information. You can exit out of the program at any time. To go back, just click the icon and select MODIFY from the toolbar and go to the section you want to complete or change. You must supply all requested information (i.e., names, street addresses, dates, amounts, etc).

e. Two hints: First, the program requests middle names for every person you list. In many cases it is extremely difficult to find out the person's middle name. You can use MNU (Middle Name Unknown). If it is absolutely impossible to find the first and/or last name of a former supervisor, then use FNU and/or LNU.

However, try to supply as many as possible, particularly with family members. Second, you will also be asked dates. The format is YYYY/MM/DD. If you don't know the exact date, use YYYY/MM/??.

f. WARNING: You must supply information going back seven (7) years. Some parts of the EPSQ say to only go back five years. This is because the form was produced by an agency known as DSS (Defense Security Service). This agency no longer conducts the investigations on contractors for computer access. OPM Investigations uses the DSS developed EPSQ; however, the contract provided to them by the Department of Defense (DoD) specifically states that a full seven years are required. OPM Investigations has no choice but to comply with DoD requirements. EPSQ without the full seven years of information will be shredded and no further action taken.

g. Be sure there are no date gaps of 30 days or more on residence and employment history. Employment history also includes periods of unemployment as well (see “7” on the drop-down menu). Gaps of over 30 days will result in the EPSQ not being submitted and no further action will be taken.

h. If you answer “Yes” to the following modules that are actually questions: Modules 7; 16; 17; 18; 19; and 20, please include all requested date(s), amount(s), and location(s). Use the “Remarks” selection on the right-hand side to provide a full explanation of circumstances.

i. When finished, select VALIDATE from the toolbar. This will show you if there are any errors, such as date gaps. The validation must show no errors and this sheet must be sent in with the EPSQ.

j. GO TO PRINT (fourth option from the left) and print off a hard copy of the entire questionnaire. Sign and date the completed form in two places towards the end. The first signature goes on the line just below module 20 with wording of CERTIFICATION BY PERSON COMPLETING THE FORM. Go to the second page after that. It has “Authorization for Release of Information.” Sign and date on the bottom of this form. There is a third place to sign and is the

next to the last page with the statement "Release of Medical Information." This page can be discarded. However, there is one page after the "Release of Medical Information" and this one is required to be submitted.

k. You will also need to be fingerprinted by the local police department, state police, or on a military installation. Be sure to use the standard FBI fingerprint card. The upper left hand corner on the front has "APPLICANT" and the upper right side has a block that states "ORI."

The block will have:

USDISOOOZ

DIS NACC

FT COLABIRD MD

Or it may have:

USOPMOOOZ

OPM

BOYERS PA

Also, on the back in the lower left hand corner it has FD-258 (REV 5-11-99). THE FINGERPRINTS MUST BE REGULAR FINGERPRINT INK. ELECTRONIC FINGERPRINTS WILL NOT BE ACCEPTED.

l. Remember, security will need the questionnaire signed and dated in two locations, the validation sheet, and the fingerprint card. ALL MUST BE ORIGINALS. OPM Investigations will not accept faxes or attachments.

m. One additional item is required. A copy of the your birth certificate, passport, or naturalization papers unless the EPSQ reflects that you are not a U.S. Citizen. All others must be verified.

n. Remember the four required items:

i. Complete EPSQ Signed and Dated.

ii. Validation page showing no errors.

iii. The correct fingerprint card. An incorrect one, with any deviation from the above, cannot be used. Fingerprints must be done with fingerprint ink. We cannot submit the new electronic or digital fingerprints at this time.

iv. Copy of birth certificate, passport or a copy of the naturalization papers.

o. The above items are mailed to: (see next page)

DRMS DDS (Personnel Security)
 ATTN: Paul Cochran
 74 Washington Avenue North
 Battle Creek, MI 49017-3092

3. The contractor will also need to provide a DRMS Form 1986, Contractor Request for Assignment of a Logon Identifier, to the appropriate Contracting Officer/Contract Specialist.
4. The DRMS Form 1986, can be viewed or downloaded from the following website: <http://www.drms.dla.mil/special/misc/bossfeb04.pdf>.
5. Once a login authority has been assigned, DRMS will notify the contractor and provide detailed instructions for using this login.
6. An offeror who is unable or unwilling to obtain the information listed above will not be eligible to receive the award on this solicitation only.
7. For those offerors/contractors who have no experience with input into the DRMS BOSS, training will be provided at no additional cost.

H.2 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRES FAR 52.222-42 (May 1989)

CLASSIFICATION		BASIC HOURLY RATE
Environmental Technician	GS-07	\$13.49
Truck Driver (Heavy)	WG-08	\$16.08
Heavy Equipment Operator	WG-10	\$17.29
Fork Lift Operator	WG-05	\$13.98
Tractor Operator	WG-05	\$13.98
Laborer	WG-02	\$11.14
Airplane Pilot	GS-11	\$19.97
Secretary III	GS-06	\$12.14
Guard I	GS-04	\$ 9.74

H.3 DEPARTMENT OF LABOR WAGE DETERMINATION DRMS 52.222-9R01 (Dec 1995)

96-0223 (Revision 18) (Wage Determination Number)
 05/23/2005 (Date of Wage Determination Number)
 III (Attachment Number of Wage Determination)

H.4 POWERTRACK PAYMENT, APPLICATION AND ACCEPTANCE DRMS 52.232-9R07 (NOV 2003)

Payments under the resulting contract from this solicitation will be made using U.S. Bank, PowerTrack. No payment will be made to the awardee until the application process is complete and the awardee is accepted by U.S. Bank. The awardee shall sign and execute an agreement with U.S. Bank. The awardee must pass compliance with the Patriot Act and the Office of Foreign Assets Control (OFAC) of the Department of Treasury. This is done during the application process with U.S. Bank. The awardee shall contact U.S. Bank and arrange for system set-up, training, and project management/implementation. The awardee must contact Dave Sullivan at U.S. Bank PowerTrack. He can be reached via email at dave.Sullivan@usbank.com or by telephone at 301-293-4228 or Everett Doolittle at everett.Doolittle@usbank.com at phone number 612-973-6156 or 612-803-5619 for applications and questions. Contractors may also contact Dave Sullivan or Everett Doolittle to get a copy of the Agreement that is signed upon approval for PowerTrack.

Payments can be tracked with your access password once PowerTrack is approved for the awarded contractor. All payments made on this contract through U.S. Bank are subject to a mandatory fee for each payment that is paid on this contract. The fee is paid to U.S. Bank for processing of payment by electronic means (24 to 72).

I.62 PAYMENTS FAR 52.232-1 (Apr 1984)

I.64 DISCOUNTS FOR PROMPT PAYMENT FAR 52.232-8 (Feb 2002)

I.65 EXTRAS FAR 52.232-11 (Apr 1984)

I.66 INTEREST FAR 52.232-17 (Jun 1996)

I.67 AVAILABILITY OF FUNDS FAR 52.232-18 (Apr 1984)

I.68 ASSIGNMENT OF CLAIMS FAR 52.232-23 (Jan 1986)

I.69 DISPUTES:AGREEMENT TO USE ALTERNATIVE DISPUT RESOLUTION DRMS 52.233-9R02 (Apr 2000)

The parties agree to use their best efforts to resolve any disputes that may arise without litigation. If unassisted negotiations are unsuccessful, the parties will use alternative dispute resolution (ADR) FAR 33.214, Alternate Disputes Resolution techniques in an attempt to resolve the dispute. Litigation will only be considered as a last resort when ADR is unsuccessful or has been documented by the party rejecting ADR to be inappropriate for resolving the dispute. If the ADR is not successful, the parties retain their existing rights.

If you wish to opt out of this clause, check here []. Alternate wording may be negotiated with the contracting officer.

I.83 VALUE ENGINEERING FAR 52.248-1 (Feb 2000)

I.84 TERMINATION FOR CONVENIENCE OF THE GOVERNMENT (FIXED PRICE) FAR 52.249-2 (Sep 1996)

I.86 DEFAULT (FIXED-PRICE SUPPLY AND SERVICE) FAR 52.249-8 (Apr 1984)

I.100 ORDERING FAR 52.216-18 (Oct 1995)

Such orders may be issued from the date of award or 04/13/06, whichever is later through the end of a 18 month period.

I.101 ORDER LIMITATIONS FAR 52.216-19 (Oct 1995)

(a) Minimum order. When the Government requires supplies or services covered by this contract in an amount of less than \$1,000.00 per task order, the Government is not obligated to purchase, nor is the Contractor obligated to furnish, those supplies or services under the contract. The contractor shall honor any order exceeding the maximum order limitations unless that order (or orders) is returned to the ordering office within 10 calendar days after issuance. **This minimum order requirement does not apply to the task order if it includes a special requirements CLIN (6300-6599 series).**

(b) Maximum order. The Contractor is not obligated to honor—

(1) Any order for a single item in excess of \$150,000;

(2) Any order for a combination of items in excess of \$300,000; or

(3) A series of orders from the same ordering office within (10) days that together call for quantities exceeding the limitation in subparagraph (b)(1) or (2) of this section.

I.102 OPTION TO EXTEND THE TERM OF THE CONTRACT FAR 52.217-9 (Mar 2000)

(a) The Government may extend the term of this contract by written notice to the Contractor within 14 days before the end of the contract period; provided, that the Government gives the Contractor a preliminary written notice of its intent to extend at least 60 days before the contract expires. The preliminary notice does not commit the Government to an extension.

(b) If the Government exercises this option, the extended contract shall be considered to include this option clause.

(c) The total duration of this contract, including the exercise of any options under this clause, shall not exceed **42** months.

I.103 INSURANCE-WORK ON A GOVERNMENT INSTALLATION FAR 52.228-5 (Jan 1997)

****NOTE:** Minimum amounts of insurance referenced in para. (a) above are as follows:

TYPE	AMOUNT

SECTION K
REPRESENTATIONS, CERTIFICATIONS, AND OTHER
STATEMENTS OF OFFERORS

K.0 CLAUSES INCORPORATED BY REFERENCE FAR 52.252-1 (Feb 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the contracting officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

<http://www.dla.mil/j-3/j-336/icps.htm>

<http://www.arnet.gov/far/>

<http://farsite.hill.af.mil/>

K.1 PROHIBITION OF SEGREGATED FACILITIES FAR 52.222-21 (Feb 1999)

K.3 CERTIFICATION AND DISCLOSURE REGARDING PAYMENTS TO INFLUENCE CERTAIN FEDERAL TRANSACTIONS (DEVIATIONS) FAR 52.203-11 (Apr 1991)

K.4 ANNUAL REPRESENTATIONS AND CERTIFICATIONS FAR 52.204-8 (Jan 2005)

(a)(1) If the clause at 52.204-7, Central Contractor Registration, is included in this solicitation, paragraph (b) of this provision applies.

(2) If the clause at 52.204-7 is not included in this solicitation, and the offeror is currently registered in CCR, and has completed the ORCA electronically, the offeror may choose to use paragraph (b) instead of completing the corresponding individual representations and certifications in the solicitation. The offeror shall indicate which option applies by checking one of the following boxes:

☐ (i) Paragraph (b) applies

☐ (ii) Paragraph (b) does not apply and the offeror has completed the individual representations and certifications in the solicitation.

(b) The offeror has completed the annual representations and certifications electronically via the Online Representations and Certifications Application (ORCA) website at <http://orca.bpn.gov>. After reviewing the ORCA database information, the offeror verifies by submission of the offer that the representations and certifications currently posted electronically have been entered or updated within the last 12 months, are current, accurate, complete, and applicable to this solicitation (including the business size standard applicable

to the NAICS code referenced for this solicitation), as of the date of this offer and are incorporated in this offer by reference (see FAR 4.1201); except for the changes identified below [offeror to insert changes, identifying change by clause number, title, date]. These amended representation(s) and/or certification(s) are also incorporated in this offer and are current, accurate, and complete as of the date of this offer. Any changes provided by the offeror are applicable to this solicitation only, and do not result in an update to the representations and certifications posted on ORCA.
